Do men express anxiety often through anger headache % alcohol use Andrea Peterson in the Wall Street Journal a still did to this issue and joins us now Andrea rew what's the difference between normal anxiety that we all have an app normal anxiety to wait for you than normal human emotion and actually turn amount of it a good thing it can be a motivating force when it can with make us motivated to prepare for a big presentation at work go to the doctor for feeling awful but it is when it becomes the corner when it is so confident in the year that entire life said interferes in our work and our relationships becomes an anxiety disorder. what are some of the ways that men express anxiety and how does that differ from the way women do? you fight we think of anxiety here I think the pick shirt off and you're someone who worries a lot or who have waged saying that might be frightening for them like public speaking but one of the technologies that are increasingly understanding is that men can express anxiety much differently they're much more likely to complain and about should the coal and up like difficult be sleeping or muscle aches and pains or headaches also more likely to choose so viewed drugs and alcohol could deal with feelings of anxiety what may look like a drinking problem actually can be an underlying anxiety disorder and often men response with and anxiety with anger and irritability so I look like a loose Cannon that point like other could make could be anxious. Andrea was scaring your stories know is that there is a strong link between anxiety and suicide, talk about that. Right, about what a quick drink and anxiety disorders could be very afraid lying can really get hurt here what a month what relationship they also can lead to increased risk of substance abuse and depression and anxiety and depression often go hand in hand but what the new research is really showing but there's a link between anxiety and suicide, and what's kind of surprising is that while depression is the mental illness but most strongly Associated with the suicidal thoughts but often leads to suicidal acts like indict the owners actually are more likely to a good side good final AP know and the minute probably know men are much more likely if they're actually more than 3 times likely than women to die by suicide so there's a

real sort of kind of like forgotten we've got to attention and I told them. Andrea Peterson in the Wall Street Journal I'm andrew along those same lines men are less likely to receive help and treatment for such issues, young men are less likely to reach up for help to get treatment for mental health issues and you know the cause I talk to the often it because stigma in the room the people are a lot of men have not won a flick comfortable have not been fighting cal lum that it's not okay to be vulnerable or expression emotions I college but you need it you are the fan out third partner or a loved one man who would you might be suffering from anxiety and certain things you can do to make it more likely they'll be receptive to encouragement they each that they get help one thing they don't deliver an ultimatum don't say no you get help or Alpha is more likely to cut the power bone relationship actually can you then make some men more with the offense to choose seeking help. one thing you can do it really you I like the way it is a quality of life and improve for treatment they say they Theoretically get treatment we could you could really enjoy life more, we can enjoy each other more. thanks Andrea, Andrea Peterson of the wall Street Journal.

in 1975 researchers at Stanford invited a group of undergraduates to take part in a study about suicide they were presented with pairs of suicide notes in each pair one note had been composed by random individual the other by a person who had subsequently taken his own life the students were then asked to distinguish between genuine notes and the fake ones some students discovered they had a genius for the task at 25 pairs of notes they correctly identify the real one 24 times others discovered they were hopeless they identify the real note in only 10 instances as is often the case with psychological studies the whole setup was put on will have the notes were indeed genuine and that it obtained from the Los Angeles County coroner's office the scorers were fictitious students who have been told they were almost always right were on average no more discerning the those who have been told they were mostly wrong in the second phase of the study the deception was revealed the students were told the real part of the experiment was to gauge their responses tooth thinking they were right or wrong this it turned out it was also a deception filing the students were asked to estimate how many suicide note they had actually categorized correctly and how many they thought an average student would get right at this point something curious happened students in high score group said they thought they had in fact done quite well significantly better than the average student even though as they had just been told they have zero ground for believing this Conversely those who had been assigned to the low score groups said they thought they had done significantly worse than the average student a conclusion that was equally unfounded once formed the researchers observed dryly impressions are remarkably perseverance.

Welcome back. we are pleased to be joined once again by chief kris allison of the central point police department. again chief, thanks so much for being here. its really a pleasure to have you partner with us on this campaign that were starting called in this together . again, that is what were kicking off to compact the suicide problem that really is a problem in our community. from your perspective, are you seeing an increase in calls about this? allison: yes, we are. so not only are we seeing an increase in the events were seeing an increase in our mental health calls; which again, can be those indicators for something like this tragically to happen. so yes and i think thats why it's so important that were a part of this campaign. talking about it really is one of the first steps in just getting that awareness. allison: absolutely. we want to be the ones to start the conversation and it's difficult to have these conversations which individuals, especially people that you love. but, we want to make sure that were having them so that were keeping them safe. does there appear to be a catalyst such as drugs or other factors that seem to point to common pressure points of high risk behavior? allison: i think that there is a lot of different

points of high risk behavior, all of those can be one of them. a lot of times its a difference in the personality, a life event change, whether its drugs, alcohol or just depression, mental health; theres so many different things that can be the catalyst or there can be no indicators at all. so thats why i think its imperative that you have family members who are tuned in who may be able to catch that more than what we could. and what would you tell someone watching who may know of someone at risk about what they can do to help, or what kind of help is available? allison: so, theres a lot of different resources. theres the ones that i think most of us know but theres also a piece of just being with them, noticing not to sweep it under the rug and not think that this isnt something that could be a possibility that they're thinking because if you're talking about it, or if they're talking about it, it could be an issue with them and not to ignore it. of course. and chief, also, we just want to thank you again for being a partner with us on this. if there is anyone watching at home, we just want to remind you that there is help available and so if you are struggling, you can call the national suicide prevention life line, you can also text 741741.

Tonight we have a profound past no tragedy not talking serious criticism of the BBC the foreign affairs select committee the Ministry of defense and the government as a whole the official explanation was dubbed the caddie to liberate he took his own life but such is the master of public debate at the time so divided as a nation and the war in iraq that his sudden death spot any number of conspiracy families while up to caddie with debt accepted it the suicide of as we're concerned that normal procedure is following the sudden death Linux followed by Neil sorry teeth among what it takes what a group of magical adult to this I have a full time to his mind so curious mind fear uncertainty the unusual nature A team party and one questions and really the question is did he commit suicide Jones is a consultant vascular Sajjan he was one of a number of prominent medical doctors and scientists that in 2009 signed an open necked for saying that they had multiple serious concerns about the medical and forensic evidence used to conclude that up to kelly killed himself and injury to go to katty on is thought to have contributed to his death that adult is questioned whether that was 90 the statement by adults can this time the indicates that they expected the Fed to suicide but a group of medical and legal experts is challenging the finding no because they should note Kelly couldn't take the same knife that because they believe it couldn't possibly have happened in the way it's insane that confence has helped at all that's beyond our country is tiny city and it's at its peak it retracts muscle claim is that the two ends of the Austrian the says it doesn't need very only injury to his wrists which Israeli your area of expertise ABB few have seen and it's somebody who has died from a similar injury I've never seen anybody die from a young girl free hand laceration couple minute we are through a mixture of those seen new cases recorded I think we found one in prison in Brazil that its favorite do more to end all the more information that is provided the most suspicious when they came the paramedics described quite relieved that there was a initial Blodgett the site to die you choose a loss amount but you would lose promote trade to feds ago circulation before become their vessel the story began with the UK government's controversial decision to join the United States in its invasion of iraq in 2003 the government claimed it had evidence that the Yami sit down he's saying was able to launch chemical or biological attack within 45 minutes it concludes that the rock hands chemical and biological weapons that's that has continued to produce the that he has existing and active military plans for the use of chemical and biological weapons which could be activated within 45 minutes including against shia population and that he is actively trying to acquire nuclear weapons capability it David Kenny was sent multiple times to iraq as U.N. weapons inspector he

told ABC Genest 100 get again he was worried that the 45 minute flight was based on flawed evidence the BBC he ran the story without naming any source that government officials when David and say began at damaging route between public brought costa and the government I asked the BBC when they will start buying allegation they made that we need for deliberately exaggerate to a bee I'm the obvious question is Yes the a robust Yes event city dubbed attendees 9 became public and clients private signs taste was thrust into the spotlight my background is that scientists once a month to go to school but for the most views speak up use called to give evidence in a pond mention hair and David Tenney faced tough questions I reckon do chess you these two dozen to an already heated if so what we need he said happened he would be under intense pressure energy Yes I think they were accusing him of making up these sort of things and there was a set amount of unpleasantness so I could certainly see in these under pressure I think suicide is that a possibility the group adult his chief complaint was that normal Any sudden unexplained all violent deaths is procedure as it seems and being followed by the investigation by Carmen in the UK that within hours authority of the body being found the then Prime Minister Tony Abbott and opened a judicial enquiry into the death suit proceeding a car is called but with less ego I wrote the old Hudson was given the task of conducting the enquiry its PMI time such an enquiry has replaced the coroner's report one individual tax in the U.K. Department of old happened with say rapid that there are a lot of questions being lost the would never set aside a pretty don't know how to lose stops losing party on the basis that Kelly had killed and that was a bit of an assumption where is he may have killed himself.

President Trump is calling for full reform of mental health laws to combat gun violence also to mass shootings in the country over the weekend will hit from a gun policy expert so if you look at all of that interpersonal violence that has caused by people with mental illness it's about 4% there are far more likely to harm themselves through suicide or to be the victims of violent crime we should absolutely be strengthening in addressing gaps in our mental health system but that alone is not going to solve the problem

an advocacy group for what policy is made up above the kind of public this course where were people or where you end up with too many people looking Kim Kardashian's butt of well-known issue but you will he end the most Noble and prestige of medical and wet fixture in over the world act act that could feed can say a patient need not be dead before we take their organs they need to be either profoundly disable or weaken live Harbor them with confab third he's done now in belgium and back in 1993 when I first started I came out against euthanasia I warned that if we go down the euthanasia row eventually there will be the idea wait a minute we're going to be killing a patient they be great sources the organs in belgium where euthanasia is legal they actually now enjoying euthanasia actively killing somebody with stripping them of their organs with concerned or with file can we saw it in bed with Compan and the people that they are looking to recruit with consent for organ stripping conjoined with few the nature of our people with disabilities in her upscale disability and mental illness for

because they're killing euthanizing him Belgium and the Netherlands people with mental illness from and I read and I quote him and the culture of Up by ie I quote the they respected international organ transplant Journal that the score tied for patients being brought into the hospital killed their lungs taken a stand and described how the transplants were successful one of those patients mental illness of 3 with the table one movement we know that mental illness with self-harming so good that quote treatment for the self-harming bus that killed a heartfelt Harbor and basically couple felt armor your dad has greater value than your life because if you allow a youth an issue we will then be able to take your organ for help people who want to live I can't think of anything more dangerous to people and more abandoned me to people who were proud to wear the staring whoever who were having difficulty getting from day to day the County map expect perhaps having society believe that those well I I mean the famous line that you hear people throw often in the comedy's were more than serious you know treatments is I'd I'd be better off dead and the medical community and in the Netherlands and Belgium is saying Yes you'd be better off dead and we'd be better off if you were dead because we could have your parts it that's right that that is exactly the message that is beginning to be sent with regard to euthanasia law and the Netherlands and Belgium add and those who think that a 5th of to offend you the nature can be limited to the terminally ill art are are Whistling past the graveyard because the base for euthanasia effect killing an acceptable for the human suffering and there are a lot of people suffer far longer and far more profoundly than people who were terminally ill and that's why while safe society generally accepts the proud of you see this incredible play universe that never stops expanding 8 p.m. the in the Netherlands now fight fighters killed mentally ill patients we know that about 60 patients per year these are not people with cancer these are people with mental illnesses and they'll jump I mean I'm sorry we got up from New York and harvesting the Belgium elderly couple who fear it may even be helpi who fear the future with a Hood are being killed in join UEFA nation gap morning from the idea of me I'm a joint suicide belt the couple of the tragedy to a form of medical treatment of the legal euthanasia law Belgium it's really frightened I'm talking Wesley Matthews offer groceries what he called true death from the Discovery Institute how not to get too far into the weeds but how do they get past the question of consent because ask about that but if you're treating somebody you're here you have a patient who is mentally ill and his notch who in their right mind how do you how do you get meaningful consent from someone who is clinically depressed or not you are not mentally competent what you see in euthanasia advocacy the difference between them for their ic of incapacitated and capable if you are if you're if you're a law for example on assisted suicide you have to be capable of that injury able to communicate what you want and so you end up with some very blurry line about it so somebody could be very depressed but they'll be able to understand what to do with they're asking for right mean Yeah they could but their mental state is not going to have another fact on the way he answer the quest to court could issue a warrant for the and but you want to accept this culture of death consciousness that killing of acceptable for the human suffering that the suffering that cop with too few to becoming kill a person keep expanding because of you end up in a circumstance where you're saying suffering because ending suffering or eliminating suffering becomes the Bell and all and be all I want to accept the idea that eliminating suffering that important state very Maybe make use of quickly morphed into eliminating the suffer maybe should call your next book a little shop of horrors make the non-fiction version work every time

you see this beast it gets bigger and demands feed me more why you always the good that for very good metaphor because once you accept the idea it moves and moons on most maps the idea behind futile care appearing to give confab exposed to be could be the end-all be-all personal economy that's a big issue in bioethics what happened without futile care period which said they were going to refuse want life-sustaining treatment was pleased that this was made the program chair at the Center for human except it wasn't the discovery instead the offer of a culture of death the age of do harm medicine.

reporter: is combat related posttraumatic stress disorder is too severe for him to stay in the military. doctor say he needs help, but instead of leaving the army honorably for medical reasons, in april a high-ranking army official made a choice to kick him out of the service without honor, without va benefits, without help. the discharge, other than honorable. the reason, misconduct. >> i don't know how to function normally and that's another reason, i don't know what i'm going to do. in over seven months last year, smith got in trouble for three alcohol-related incidents. twice he showed up to work drunk and then he got a dui. all behavior doctors could've predicted. >> substance abuse is as much a part of ptsd as pain is a part of cancer. >> reporter: the only one scott smith one of the best. not only is he decorated with honors but in work evaluations, he consistently exceeded army standards, but what these records don't show what smith's private struggle. >> i would be at work and have an anxiety attack or panic attack and start freaking out and go get what i've always gotten, go get alcohol. >> reporter: smith had a dui before the service when he was 22 but after his first deployment

he said he started turning to alcohol not just in social situations but to simply function. the army sent him to treatment, their first of several attempts to get him help, but it didn't work. >> it's when you get home that your brain starts processing everything that you went through and we were trying to process it by ourselves and alcohol was the only way we could do it. it wasn't going and talking to somebody. >> reporter: smith can talk about the helplessness he felt in battle. listening over the radio to his friend died. he couldn't talk about what it felt like to know that soldier died and somehow he made it out of three separate ied blasts. >> i told myself over and over in my mind, just keep squeezing the trigger until you get shot. >> reporter: on the same diplomat, smith says his platoon walk-through in afghanistan village right after the u.s. military hit it with mortars. >> you see kids burnt up and toys and stuff on the ground and women burnt up. >> reporter: a memory that haunts him more now that he has a family. >> it is somebody's kid over there. >> reporter: last year all that unresolved pain came to a head, that's when smith started showing up to work late and drunk. the army again sent him to treatment and they put him on a track to get out of the military with a medical discharge. it's the same process they've used to separate tens of thousands of other soldiers with ptsd. after smith in december got that second dui as a soldier, his captain put a spot a stop to that medical track. he recommended his superiors that the army instead punish smith by kicking him out for breaking the rules. this is neuropsychologist robert stennis who specializes in treating veterans. we asked him to review smith said smith's record. >> if you look at what's being called misconduct, it's really a measure of the severity his symptoms. >> reporter: two psychiatrists who examined smith in person agreed. smith was using alcohol to avoid his trauma, to relieve the symptoms of his ptsd. in the end, it would be up to not a doctor, but a major general at joint base lewis mccord to decide whether the struggling soldier deserves lifelong benefits and help or nothing at all. and you already know smith walked away empty-handed. >> i should've picked a different career. >> reporter: commanding generals always have the power to decide a soldier's fate in the army, even though suffering from medical issues like ptsd, those decisions are now coming under scrutiny. last year we introduced you to the sheldon veteran. >> we witnessed a mass lottery. >> reporter: he too was diagnosed with severe ptsd. more than once he tried to commit suicide but against the advice of the army's own doctors, an official kicked him out of the military with another than honorable discharge because he smoked weed. after our investigation, whistleblowers at madigan army medical center came forward, they told us the army has a pattern of punishing soldiers who are like ball and smith. >> just like the rats jumping out of the water, get them out. >> reporter: soldiers who fought their wars, suffered immensely and now really just need help. what do leaders have to say about that? we've been asking for interviews about this issue for nearly a year. they declined and in a statement, a spokesman said that smith was treated to a fair separation process, he said army officials consider input from medical providers when making the decisions but the army is sticking by their decision. >> it's ironic, they are diagnosed with post dramatic stress and the army just severs as if that has no relation to their service. it's hard to get my head around this. so what is next for these guys and what is big picture? is this happening to more people? >> reporter: ball and smith have left the state of washington, they are filing claims with the va. they're not guaranteed to get help but they are trying to get it. we know from people coming forward to us from what the whistleblowers say that this is still a big problem and we are going to keep reporting on this.

we mustntal state of the killers. health laws to better identify reform our mental mentally disturbed individuals who may commit acts of violence and make sure these people notment, but when only get treat confinem necessary, involuntaryent. mental illness and hatred pullstrigger, not the gun. the >> nawaz: we look now at s the questions that are again inome of the air, in particular, what, if should be done anything, can or to curb gun deaths in this country. shanwe get two views. demand actnon watts is founder of moms organization she established inion, a grassroots the days after the 2012 shootinglementary school, at sandyhook e to strengthen larry wardu.s. gun laws. is chief marketing officer with gun dynamics, aun-rights group that promotes gand the gun industry.ng the time. shannon, i'll start with you welcome to you both. thank you for makiand if you. i want to take a moment, day like can, on ay americans are reeling today, when man weekend, what is your mes from the events over the them? what specifically are tsage to see put intohe changes you would like towell, we are specifically place? >> calling on congress to come bdo theirack from recess and to to pass legislation that w jobs. we're asking them states, e've seen work in theon every ga background check sale, 21 un asstates now require that, as well red flag 17 states have red legislation.nd have shown flag laws a interrupting gun to be essential in gun suicide andfor congress to do their homicide, and it is time otect americans instead ojob and unf protecting g manufacturers' >> larry ward, what was your profits.vents of thisreaction when you heard about the e horrified. weekend? >> i was violence is terrible. at the end of the day, all gun that keeps ha we're looking at this thing again. according to thppening over and over prevention research center,e crime shooter and mas 94% of these activeins shootings take place ree zones. gun-f what you just hea >> shannon, what's your response lar. >> first of all,rd from larry true most it's notin mass shootings occur most gun-free zones. residenoccur in private violence.ces and domestic free wal-mart was not a gun zone. allowed in open carry was were armed wal-ma and there happened. customers when the shooting it's been so those are talking points. over debunked over andcks required on again. there are no background che sales in unlicensedin 29 states, it's this country and mi helped so many criminalso guns. and nors get easy access tone law wthe idea just because ave stopped oneouldn't hhat specific mass shooting t as shouldn't have been passed is nine. we don't sayone law talk care of is going tow they would work on guches. we knoral a fede. >> we want to as level the president said,k you about what talking about mental what people are health.s shooter the sutherland spring health issue and had a serious mental comprise a large number suicides actuallyeaths in america. so what' of gun violence dat argument. s your response to th homicides only about 5% of>> when you look at gunhow shooters sany sign illness. we know of mentalare menpeople who likely to betally ill are moreand victims of gun violence after the sandy perpetrators. it's a talking point. blamed video hook, they games, movies andental m. studies show illness a it's none of that. we have25% higher hiring guns suicide rate because ofd,

you're a gun themselves. >> larry war owner. you're speaking on owners who behalf of
 gunminority o comprie a regulations wof americans. what safetyo sign on to?uld you be willing
 tabout safety, i'm talking >> if we're talking safety, and the only way about peop somebody
 with murderous to stop to shoot, intent that goes into a place t to run over, place to stopo drop
 a bomb, the only is to have people these peoplehore wity to defend themsel vigilant with their
 abil around them and to makeves and the peoplee that law sur are abiding citizens see, what
 happened armed so they can act. there happened to in date onescer there. of course, thabe an
 armed police offi wholet most of those stores and area has and clubs were all restaurants gun-
 free zones, so tha place wat's why theonnen,s ch but thank god there was an officerhe dayton
 shooting. at the s there. >> let me ask you about t died in the shooting.ame time, nine people
 nothing could you sayingnt the have been done to prevecase hasn't deaths? >> the whole lot
 made aboutcome out. there was a whole blaming president trump, you blaming, you know,
 know, ands and ideas on t president trump's policie border. so weheivations don't know the
 mot shooter. of that particular them? would anything have stopped driven -- no, he could
 havend driven it and rented a truck aunch of people. run over a b didn't use >> but hese add
 gun. we knowa truck. he u. i want to st he doesn't use a truck knowick toto what we the
 motivation of. as you mentioned, we do not knowshooter at this point. it is the dayton alleged

convicted pedophile and accused sex trafficker jeffrey epstein is dead by apparent suicide and a lot of people including bill barr want to know how it could've happened while he was in federal custody in manhattan and barr has already ordered an investigation. he had been held in the manhattan correctional center since his arrest in july pleading not guilty to federal charges after prosecutors accused him of sex trafficking dozens of underaged girls. his request to await trial at his mansion was denied and he was ordered to stay at his facility. they say he was found dead early saturday morning and shocking news for epstein's accusers who have continued to speak out . suspected jeffrey epstein rape you? >> yes . >> he said he has to live with the scars of his actions and whatever face the consequences of the crimes committed. the death of jeffrey epstein came 24 hours after documents were unsealed in a case from a epstein accuser.

the 2015 defamation suit was filed and she said she was underaged when he kept her as a sex slave for many years and among them was prince andrew in 2001. the apparent suicide was not stop in the investigation into his crimes and his death may result in even more scrutiny for his inner circle of wealthy friends including the one implicated which even includes his friend. holly williams reports from london. >> reporter: documents contain allegations that gislaine maxwell played a role in jeffrey epstein's abuse ring directing an underage girl to have sex with epstein and others. maxwell denies the allegations and jack scarola is an attorney who has represented the victims. >> there are multiple victims who claim that gislaine maxwell was a personal participant in recruiting them and their allegations that she was an active participant in the abuse. >> reporter: gislaine maxwell has been described as epstein's ex-girlfriend and assistant and a socialite who helped connect him with the wealthy and famous. she even founded a charitable environmental group but gislaine maxwell has also been described as a madam. Jack scarola says that included gislaine maxwell . >> when a nonprosecution agreement is entered into that grants immunity to gislaine maxwell and other named and unnamed co-conspirators for unspecified crimes, that just doesn't make any sense at all. >> another famous person in the scandal is prince andrew. the unsealed documents repeat allegations maxwell trafficked to prince andrew and neither gislaine maxwell or prince andrew have been charged with any crime and buckingham palace said in a statement any suggestion of impropriety with under age minors is not true but prince andrew and his friendship with jeffrey epstein are once again on the front page.

we hear away here to reports of william Barber visiting Jeffrey Epstein these reports now none confirmed but don't give a there they're making the rounds that william Barb visited Epstein a couple weeks us earlier you grow up at that shortly after that visit is what he was taken off suicide war logs you and celebrities weighing young by Deborah messing says it finally killed someone on 5th Avenue hopes and says barred gives tips the enough rope to close the case I'm proud of that but at the but it but honestly you have to think well here here is william barr misses the attorney general and he's speaking now and he's not pleased with what happen I was a full and indeed the whole Department was and frankly to learn of the ems CC's failure to adequately secure this prisoner we are now learning of serious irregularities at this facility they are deeply concerning and demanded a thorough investigation the fbi and the office of inspector general we'll get to the bottom of what happened and there will be accountability but let me assure you that this case will continue gone against anyone who was complicit any coconspirators should not rest easy the victims deserve just Press off grew up with you think he wants his words back if you watch his words back after his appearance on that that the pod cast when he talked about Justice Supreme court you play this last week I tell you what your impression viewed it at the time you probably didn't really realize how big this is going to be a message here is that he's not he's not a podcast and and its crime stories the name of the pod cast to talk about Justice and meet Justice case the White out whom may interesting the right outcome it doesn't do jeffrey epstein qualifies at that you know probably Yeah and you foe if you this am if he's done what he's done as a lot of people that are now we have one less

pedophile great now but the attorney general Ha Ha that's what really justices that's hope you have a longing I believe the sense of Justice is hardwired human beings don't ask me why but it is they're in it's satisfying to see just this dog now it is true go away I think we all since when one there's been an injustice it's why I think some people are so dedicated to stay on the case for 20 years about somebody who might have been put in prison Wrongfully for murder or something like that there there it adds through DNA testing whatever they're they're vindicated these people released so am I and is a big deal our system works sometimes moment the works and we feel angry when we see injustice that isn't rectify what they're a perfect example we feeling everyone it's not rectified Americans have tended it recently to to view more processed as the criminal Justice process is just us it and it is it's a process it's so Post with chief Justice but very frequently doesn't that well that's why we have a system with there's always people out there working moved to make sure Justice is done.

be answered one of the team at least speculative for ideas about how he may have died because is that they haven't released any of that they don't know there was an autopsy but he had been and will everyone should keep in mind he had not been imprisoned that long had been imprisoned for or less than 5 weeks and I just been taken off suicide watch sean July 20 third during the period since suicide Wash their reports are I believe these are authoritative

now that he'd been meeting 13 hours a day with his various attorneys he had full war very prominent very well paid attorneys obviously can afford if he's worth 550 million dollars which is what he claimed and he Some speculation is said he may have requested that some medication from the attorneys who brought it to him boom that mean well because those medication that have been prescribed him but medication could being taken all once said overdose with many pills once have ended his life who knows we will soon they meet one thing we do know right now is that President Trump has read tweeted a video of a bike terrence came williamson he did then within hours after finding out about jeffrey epstein staff and was a bad choice for the present big cars as the ie what he tweeted out which of the hashtags clinton circle of death and hashtag clinton body count those two hashtags implying that bill and hillary clinton are responsible there was also still photograph showing the comedian who was an african-american guy talented guy by the and named terence K williams this is identified as an actor comedian commentators from oklahoma city and they showed the picture of a task K williams next to a picture bill clinton a picture of hillary clinton and it very clearly suggested the bill and hillary were responsible somehow now for at scenes death and here is some of the video what it sounded like with karen kay williams commenting about every have seen something that was retweeted by the leader of the free world to is it's over 16 million Twitter followers around the world listen and I'm shaking my head I'm not surprised I tell saw less gone happy but didn't nobody would listen to me but being guess what guys the line he did you know what all the liberal media conspiracy to cheers and tears you come O crazy conspiracy and beauty to be banned from Twitter and B guess what the main brilliant that David you know what he did he get information on the clearance in demand in about a day now for some odd reason not risen people from asia McClAIN and outdated and they usually not a suicide come on now come on now now well the way everybody down from suicide they got Jemele you okay and you know what to be honest with you I want to know nothing about coins telltale mean nothing I'm not trying to end up paying even more of Hillary as did you know I know I don't know bill playing eat boogers don't tell me that they're not alone in that day I don't want to hear no I can hear you I'm don't already here I'm nothing in there Dan like everybody else you know what now say who killed that man does because you know it could end up being and Bo Mar but but but the word around Shreveport the claims beating I'm just out just another way may have hoped that I had found that the myself somebody tell me that was normal because clearly then you end of the day if you are a high profile case in prison come home now and you also lose now watch it and you die House was not imprisoned Yeah okay somebody not doing their job or somebody got paid math tutor not to do their job so somebody can get knocked out so information don't come out don't know that I'm the Don't OK that's like Mr. Williams terrence K williams I am greatly understating I apologize for that President Trump's number of Twitter followers not 16 million inside were only loosely suggested 63 million and here is no argument about crowd size Yeah I was just wrong and was fake news on my part to say 60 to 63 million B ball got to see the wisdom of terrance cain Williams a regarding the jeffrey at steam apparent suicide I am I do think we will find out and hear more about this vOm the one thing that I think is most striking about some of the charges against

Aug 12 • 12:31 PM

attorney general bar took a moment to comment on the esteemed assist suicide question Mark I was appalled and indeed the whole Department was and frankly to learn of the MCC his failure to adequately secure are the prisoners we are now learning of serious irregularities at this facility they are deeply concerning and demanded a thorough investigation the fbi and the office of inspector general we will get to the bottom of what happened and there will be accountability but let me assure you that this case will continue gone against anyone who was complicit with that I think any coconspirators should not rest easy the victims deserve Justice and they won't get Yeah what about everybody else the and those who were complicit well and there's a lot of names and a lot of no implied names that were released shortly before he committed suicide quote committed suicide what ever happened to him you know it's some some of the illegal act documents were revealed by the judge and some names gopro up including Prince andrew I think into a number of other people who apparently were involved with with ger jeffrey have seen and so there's some people wondering if maybe that's what wasn't what caused it either he went over the edge because it was it was too much pressure because all its information is now out or if one of those people was named or implied to be named in that brief decided to take him out Dorrance Frankie to Jules thing for godfather too Yeah I and here is Marc Lotter the communications staffer said the president's campaign asked about you that within a few minutes of news coming up the President retweeted a theory that the clintons were behind the the death of Jeffrey Epstein and so here is Mark lot responding to that I think the President was basically asking some of the questions we saw millions of americans probably asking themselves whether be odd social media or just even in their own private conversations about the very strange circumstances around around this person that you even had the attorney general of the United States today say that there are some serious irregularities with this case that need to be investigated the President and his entire administration our very affirming the fact we need...

just breaking news defense attorneys revealed they push for Epstein to be taken off suicide watch defense attorneys push for Jeffrey Epstein to be taken off suicide watch ahead of his death on Saturday so said an unidentified source the financier who was jailed on federal sex trafficking charges we all now had been on suicide watch after an apparent earlier suicide attempt was taken off ahead of his death sources told ABC news that have steen had to undergo multiple psychiatric evaluations before officials decided to take him off suicide watch there's likely no video showing F seems apparent suicide death as sources told ABC news that does not appear the cameras are trained on individual cells the special housing unit where he was held there are trained rather On the whole way so if anyone went in to his cell somehow they eat they would have a record of that but apparently there is no such record so the death continues have also a mystery surrounding the one thing I do need to say vs Terrence Williams video the president Reid tweeted goes about all the people who died in and suicides surrounding bill Clinton apparent suicide a claim their suicide implying there's something other

than that murder there's only one which was vince foster who was counsel to the President and former law partner of Hillary Clinton's and Yes Yes there were reports I believe groundless but who knows that Hillary Clinton was emotionally involved romantically involved with vince foster I don't think that is true but I do know that it's true because Ken starr investigated thoroughly vince foster committed suicide he was on suicide watch she had he had to and by the way you left a suicide note he he had been diagnosed by his psychiatrist and treated for suicidal aviation and he he was a very big suicide risk at the time he took his own life and the fact that there were some fringe conspiracy theories about vince foster was murdered by bill Clinton because he knew too much own place and by the way I think that's about as live been responsible for as the claim now though there must be clinton connection or the claim and there's this claim on the left there must be a Trump connection both nonsense joy reid speaking of non-sense implicate somebody else on MSNBC Sham brigade somebody else about and stains death and alleged cover-up listen so Meanwhile the investigation of at steve death now falls into the hands of william barr Donald Trump consigliere very an attorney general who refused to recuse himself on the that sting case despite his Association with the law firm was involved with that state whose father once hired jeffrey epstein as a teacher with Snyder experience more degree and whose prime directive is to protect Donald Trump no matter what and other words we may never get the answers to how Jeffrey Epstein was allowed to die and deprive all those victims of the opportunity for Justice okay I think that's outrageous bill barr is somebody honestly with impeccable background it's why he was confirmed as attorney general and he is not Donald Trump can secure the area that was Michael collins who's currently imprisoned himself I hope I will be closely monitored now say the this is absurd and and is claiming that build bar was responsible for hiring jeffrey have seen adult to school or bill bars father was a Tom are higher look it's a mystery I've built bar does not have a call I didn't know but build are very much has a college degree in law school Center said Jeff Ramsay don't have a college degree and you get a job teaching mathematics and a very elite prep school in Manhattan which connects with also a wealthy and powerful.

Jeffrey ups saying they believe their pedophile committed suicide in a put air quotes around suicide committed suicide its high security Manhattan jail cell a lot of people just flat out and do not believe jeffrey upstage on Friday started to name some names in and look he had some of the richest most powerful people on Earth as part of what appeared to be a sex ring but on on Friday a woman who said she was 14 years old when it abstained was using her for sex and then trading out to other high profile high powered people she said the Prince Bandar was one of the people she was forced to have sex with and when you have somebody meaning of state whose starting to roll over ought to do with the Royal family bill clinton took 27 flights on this guys playing Donald Trump was seen at a fund-raiser with them the you're talking about some of the most powerful people bond earn and when one of them is the clintons because there are is Hey mom the best of clinton associate body count that's been circulating for lung lung people move mysteriously died you had accidents and meet know vince foster committed suicide there's just a long list of people who were Associated with the clintons who have not like it over

the yards in luck this guy the Royal family pictures with Donald Trump 27 times bill clinton was on his airplane and if he's starting to roll over of the most powerful people I do not think it was a suicide and I'm not a big huge conspiracy theory person general but I do not think this was a suicide everything I've heard is that it's virtually impossible to commit suicide Yeah and now we're being told today there was no video surveillance so we don't have any video of how he committed suicide because you don't have any shoe laces the a little outfit the jail uniform you where could never support the weight of hanging the think Sir paper and for the say Murray isn't it there are no bars in this jail cell it's just locker room there's no light fixture so everyone's wondering how in the world you don't need a lot of height to hang yourself you Robin Williams reportedly paying himself From adored gop you don't have to have that much but this guy just starts to roll over and be the more you hear about this person is sorry wound and glad he's dead but his victims they didn't want him gap that is the easy way out and considering he was living this billionaire's life even when he was convicted more than a decade ago and he's put on and in jail but they said but we'll let you work 5 or 6 days away and he would go to his office were apparently had arranged some underage sex Chris once again even while he was in jail while he was serving time for that he reportedly was still engaging in that behavior while serving his punishment a decade and a half ago a tough second break this AB stain wants to now he just committed suicide over the weekend he was supposedly on suicide watch we've got lifted a week ago keen was supposed to have video surveillance in his cell and somehow mysteriously that didn't happen now does not sound like a suicide two men not stop in me that's his 5th game then I tell you what and msnb state they just cannot stop comparing the President to Adolf Hitler.

it's amazing every weekend something happens era was the biggest totally serious point that we've entered the realm of the absurd in the first minute of the week that's okay I want I have often said the absurd keeps the insane keeps me same Any rate it really is them we like we ballots from massive drama to one another massive drama so jeffrey epstein kill himself was killed by somebody else in either case I think it it takes me a long time to accumulate the heat the evidence sometimes over years to actually say something publicly Um that's why I haven't gotten in trouble because I think very long and hard before say something publicly won the toss they ask you say is it would look up the actual Dostoyevsky quote you are referring to that it cut a society can be measured by it in the treatment of prisoners something to that effect nobody really cares thought nobody that that's sick cility overstate ruth who most people don't care about prisons when it when I remember when it California had ae proposition for spending more money to build prisons was defeated spend money on prisons all may give me a break we

got we got innocent people we got to spend money and and that was by the way that was right and left incidentally this is a rare a rare issue where there's very little right or left to divide like I'll give an example solitary confinement solitary confinement should unite left and right me but it doesn't change my view of the left than merely stating that up if there is something on which there can be agreement then great solitary confinement as a form of torture they are rare rare rare times when it it should be used but it is torture I consider it a more under the category of torture than I do waterboarding to give an example we're pulling his terror and this is torture people lose their minds in solitary confinement the me picking people solitary confinement if there's a cockroach in in their shells they saw talking to the Koch group so there's an example there's a think is much too much use of it why is it why was this guy up steam why was he in solitary confinement and don't tell me all they were afraid that somebody would kill they weren't that afraid anyway he had a roommate he had a cellmate I wanted to take this slowly away so later he emailed that the victim was his cellmate could prevent the 8 suicide could prevent the 8th man itself from going into depression it is it is in the East and society's interest that he not commit suicide I'm not saying he did commit suicide that 8 even that the utterly incompetent prison system doesn't even know if he committed suicide and what does this mean I don't know maybe this is a legit answer the coroner needs more information you don't even understand what that means more information he had his body while more information you need audience it maybe he ingested something that would be a need for more information to In an autopsy for with regard to not put these substances like for his faith in time so I don't know I just know the country is rightly indignant the right and left that such utter incompetence is in our prisons but it's it's it's worst did you get a dusting of keycorp pensions you probably Nelson Mandela all really it's not just the thing that's interesting okay anyway I also say if it isn't Dostoyevsky work I will say that it is a statement about a society how its prisons who are running it is because it's very tempting to look away when you have so many bad people in prison that it is commonly for men to be raped by other men imprisoned this is this is mind boggling my view of America doesn't allow for for such things so when you hear that next time was spent on prisons maybe you can think of this they kept they keep saying well we are understaffed and then you do people working in the prisons were overworked was over time so they didn't moderate but the whole or just forgetting that Amin why didn't have a roommate with a cellmate why was that guy removed the over recent lose perspective maybe beyond his last so we should all wait for of the sky helped him commit suicide in the first attempt by the way if there is an attempt to have a 24 7 watch if you think somebody will commit suicide it that you would you would you would watch to say no okay they don't write good guy they say they don't because they didn't have the money his new York times opted for jail suicide but the way he does they don't know so what kind of headline is a this jeffrey upstream it was left alone enough closely monitored Mr. Epps was supposed to have been checked by the two guards in the protective housing and unit every 30 minutes but that procedure was not followed time night in addition because Mr. up steam mayor tried to commit suicide 3 weeks earlier he was supposed to have another inmate in his cell 3 official said but the jail recently transferred his cellmate allow Mr. of seem to be housed alone decision had also violated the jail procedures me if they violate procedures without such Ha Ha ie recognition figures can you imagine of the violation of procedures wins atypical prisoner I deeply believe in punishment but I deeply believe in capital punishment we should throw it's always worth noting with these

mass murderers that the it is he right we conservatives all want to walk these mass murderers executed it's the left that those walked of executed just just thought I would note that the law enforcement official with knowledge of the investigation said that when the decision was made

attorney general William Barr us said that in the event the death of Jeffrey Epstein and have trouble talk about this guy without getting curious it was a failure on the part of the detention center in new York city I was called and indeed the whole Department lunch and frankly angry to learn of the am CC's failure to adequately secured the prisoner we're now learning serious irregularities at this facility they were deeply concerning and demanded a thorough and best days so Lisa bloom his lawyers represent some of the team's victims in a civil case against the at 18 States now they cannot prosecute Eckstine directly you want Jeffrey Epstein to face Justice we won that day when he would be held accountable he never apologized to them he never tried to make amends he fought them every step of the way they tried to get Justice I think this is Jeffrey have seems final way of evading Justice so us read through the list of things going on here I like I am just the fall old with a number of questions that exist on this and I might I just try to think like an attorney reporter I'm trying to be level-headed here is just so much we have a camera footage he was not monitor half hour every half hour and look at this and it is very difficult for me to imagine how there is trust built this you did this you know that this was allowed to happen and the serious questions raised by there's serious and I'm left before I hope that this was allowed to occur I'm not in any way the Pope Yeah anyway shocked and I'm not in any way I think that there's a conspiracy theory here Yeah it's I don't know I mean sometimes it is so frustrating you 9 11 the moon landing note announcing staff why can't people ever look at this simplest possible Let's formation find that actually works from being made which is blaming the bourne movies because I'm getting really Fed up with this idea this the Metropolitan Correctional Center in in new York this is the place that one year ago I don't know why everyone forgets about this had like a multiday power outage this is one of the most part run Correctional centers in the world I am the United States in the world Hold an early pit prisoners freezing because they could not get them heat in the center of the mobile most densely populated and wealthiest cities in the world so you got that as the backdrop here and then you've got have seen death how many people died in prison last year United States we don't know you know why we don't know because the Trump administration started redacting Department of Justice statistics regarding his death which have been reported for eons we don't win anymore but we do know a 2016 when it was 372 people died in prison now Let's look Let's add on to that the number of people who actually injure themselves to the point of death in prison but died in a hospital prison don't count that as a suicide even though it was an attempted suicide Let's tack on another 100 on that prison suicides jail suicide state at the state level and federal level the local level are rampant and been going up year after year after year the said Jeffrey Epstein this is everyone in prison and anyone who spent time there ask them if they put people on suicide watch that's effective anywhere they don't so this guy had an opportunity to kill himself and killed himself and story out of that story and the story regarding all the victims that's still be pushed through but this idea that we don't know what happened at

this facility saw how was like now agree Justice how many times the prom dresses looked at this place Yeah this is absolutely crazy does seem like they're not doing things right they never half of what I get it is Mike and candidacies braking it like everything you said makes complete sense complete sense as reading about the overtime asian about keep one of their shift as freeing up people doing jobs that they don't normally do they're trained to do but they don't do it and this is where I guess this is where I am I want to get their response to unite because I would feel like the management it's okay listen we've got the highest profile federal prisoner in maybe the world right or not a prison of the prisoner may be in the world he's in our facility he is apparently tried to commit suicide wants can we please put the best most rested people August I guess I just think the leadership of this place would say for God's sake we set screw ups don't screw this up and then just pragmatically this I guess I've said this would be the same leadership said Let's let burglars first degree burglary offenders freeze to death in our in our jail what framework is going to penetrate them lying lying and this is also a guy this guy is actually in a weird way kind of lower suicide threat to discipline him that he had tens of millions of dollars in the bank the best attorneys available now we've got out of this I doubt it and maybe he finally saw the writing on the wall it's been on the wall for what the last two years but but not the last missing management has turned a blind eye to rampant agreed his treatment of prisoners or ever okay I hope that is going to settle in people's minds is what I saw I was stunned and like us to read about this place police falling apart which raises another question for me why power Yes I get it it's jurisdictional why Barra and like in in in adolescent care facilities there put facilities in the open 25 years they've never had a suicide of kids brought in advance or suicidal because they set a caregiver next to them 24 7 for a month they're not out cited anybody for a month so why there is so frustrating and out was one of the things you said this can't stop you can't be guarded after these gate you know what ultimate hearing enough of enablers it mean that was how the right name Bush will get there you'll be hearing a lot about how there's a lot of people I thought of was mayhem too bad anthony bourdain guy because find casting movie I tried to convince anthony bourdain to play jeffrey I think they look almost exactly like he never fancied himself an actor that probably would work and whether george clooney that if your momma talking and do it however the D.C. the tour that's my back Up because you know why dejesus for these women money and a movie you know why because you think you're going to see former President bill clinton but triumph know you are not President Donald Trump attorney Alan Dershowitz and Prince Andrew that yet when you're talking about the other day no I intended to help me get this Porto's Andrew Hill won't be attorney general all william barr course that can start know he did say this prison was terrible that he was and you're never gonna see Woody Allen it so Let's go Let's go down from the start what I don't I'm not going to see that I hope it lasts I great you can put some weight of all the wood on the ice but scott Walker but what about the the woman I'm forgetting her name a move and it's gone mad money athlete who apparently was a designated pam right right about that he was modeling know I seriously how are you Yeah Yeah is promising these girls education and opportunity and things like that but you're talking about these people that either assaulted or raped underage girls are you supporting and encouraging their exploitation they will not be held accountable for their actions now you know they may be held accountable for every future endeavor they make you go ahead and ask bill cosby's state Michael jackson's estate R Kelly's the R Kelly's problem he's in right now which is a situation that lasted over decades that now he

finds himself fighting you talk about their money window lane they go caller J.C. what's going on that is what's going on the amount of evidence and living victims and the star power already in this story makes it interesting.

The attorney general of the U.S. built bar expressing anger over the apparent suicide of accused sex trafficker jeffrey epstein and sent a warning to anyone complicit and now the fbi is investigating a teen's death ABC aired pictures joining us on the company is fine if anybody had any questions about whether this case would end with the wealthy financiers death it seems like raids today and the fbi investigation are suggesting otherwise aaron well it certainly doesn't help that the information has not been fully in put out there the medical examiner's office said the autopsy is complete but they weren't going to release information because they want to wait for the investigation to come out and so who knows what that could be the attorney general has said that this raises some serious questions that need to be be answered but by all accounts to be the authorities continue to believe that jeffrey esteemed death by suicide was from hanging happening inside his cell but we know there were a number of shortcomings should have a cellmate he did not he should have been checked every 30 minutes the guard into their appointed rounds and we know there have been complaints about chronic understaffing in overtime shifts and the like but we also believe that there were cameras inside the cell block but not necessarily trained on up steam selves looked unlikely is the video be catching him in the act and that may frustrate some of the effort to get to the bottom of what happened also you know we learned earlier today that there are some raids a raid happening at his island home look we've said from the come the weekend that the investigation would not stop with that theme death we have some evidence that today when the same task course of the Southern district of New York arrest that team back on July 6 showed up by boat and the U.S. Virgin islands compound and we know that they dared to look for firm additional evidence of others who may be involved because that team was charged with conspiracy and so he was the only one name but it takes at least two to tango and conspiracy so the the authorities are hoping to find evidence of of his inner circle others who possibly could be charged what are you learning about others who may have helped him in soliciting young girls and women meet nothing it hasn't helped their minute we're not sure anyone's closer to being charged but it certainly puts pressure on some of the names that have been mentioned as associates Elan Maxwell a British social life who's been accused of being effectively Jeffrey Atkins Madam worse to women or young girls the time into going into having sex with perhaps the boldface name man that's part of the civil lawsuit but in terms of a criminal charge we're not there yet so what are the victims saying are they worried that there won't be Justice they are worried there won't be Justice there's certainly not going to be a prosecution of this of the very person that they blame for that the source of their lifelong pain that team that may not stop the investigation but stopped the prosecution and and that's certainly a painful for 4 women who may have come forward reluctantly more than a decade ago only to have that team be given a rather sweetheart deal as many beautiful time in 2008 and then they they come forward again to prosecutors in New York who file charges and now the Fed can't even keep them alive and so

they are putting their faith in the federal government may be difficult for some of these victims even though the attorney general of the United States said the case is important and the victims deserve their day in court and deserve Justice and the timing of this and really brings up the CD side of social media doesn't it with root the conspiracy theories and whatnot there are plenty of conspiracy theories some of them even retweeted by the President of the United States but no evidence that they lend Credence to any of them.

the big news that everybody is talking about over the weekend authorities found the body of accused sexual predator Jeffrey Epstein dead in his prison cell in new York he cause for death is reportedly suicidal I don't think that's been made official yet by the authorities in charge there after pleading not guilty her organizing sex trafficking ring of underage girls steen was sent to be held in the Metropolitan Correctional Center in new York state and he was put on suicide watch pretty early into his day because they found marks we remember that story G around his neck he's in the fetal position it was only after being recently taken off of suicide watch it seems steve went through with his plan now while we can all agree that he hardly deserved any better than God have seen death has caused a decent road block for prosecutors as they're trying to pin down the trafficking ring that he seemed to be a huge part of the inner circle of the trafficking ring is a huge discussion this weekend and so CBS's Holly williams talked about elaine Maxwell aid British socialite who Epstein Associated himself with in order to recruit young when documents unsealed on Friday contain allegations that delaying Maxwell played quite important role in Jeffrey it steams Sexual abuse ring directing an underage girl to have sex with and steen and of is Maxwell strenuously denies those allegations Jaczko role is an attorney who has represented several alleged victims of Jeffrey Epstein who are multiple victims who claim that juicing and Maxwell was Hey personal purchases and in recruiting them for jeffrey epstein and there are allegations that that Mr. Maxwell was an active participant in the sexual abuse Elaine Maxwell has been described as it steamed ex-girlfriend and assistant he's best friend according to its theme and socialize who helped connect team with the wealthy and famous its pastes she even founded as charitable environmental group and Maxwell also been described as Madame X stayed with reportedly able to shield his alleged co-conspirators from prosecution with a 2007 a plea deal jex Corollas say that included Alain Maxwell when Hannah on non-prosecution agreement is entered into do that grants immunity to choosing Maxwell and other

named and unnamed co-conspirators for unspecified crimes that just doesn't make any sense at all according Williams Maxwell was far from the only conspirator in this case another famous brief court dropping the scandal is Prince Andrew the unsealed documents were paid allegations that Max slow traffic to free to Prince fan true though that claim was previously dismissed by a judge in the U.S. and struck from the record court a lot of names have been thrown around we'll see how much information is released in the next week about this particular ring and people took advantage of it but one of the hoop there are two things to me that that I think are really important and one is the fact that although jeffrey epstein is dead now he is not going to be held personally liable for the sex trafficking charge but there are these conspiracy charges this is a much bigger things than him himself and his estate is going to be liable for this so you may not be able to get him personally and criminal court but his victims are able to take legal action in civil court and we're definitely going to see that happening I'm the other being how this guy under the watch n.a. n.a. high-security facility it killed himself I called some experts did Yeah you're not experts in medium talk about experts who have been inside that prison okay right the told me how it goes that far just first and foremost there's a Green light don't sex offenders she I Yeah I have that right away I think we've all heard that part of and I said OK cool he said now there's two guards to floor and talk about it is to guard Louis how he goes down they talked about how that the I mean you saw the report saying that you know they and sting was taken off suicide watch riot because of of man-hours and everything and how they need to make sure because somebody guard overworked and all that look he was technically off during that time now back to what he's he told me that when it comes to Let's just say this the regular sex offenders can't forget.

jeffrey epstein is dead that's what we also know we all vote okay you heard the conspiracy theories he's not right for me Yes I have I not dead he's smiling with bill clinton both sides that's what happened but job you love the media reported an apparent suicide and that really is the proper terminology reporting this story because if the autopsy is in yet and corner doesn't say Yes it was a suicide then you can say was a suicide going know report was a bedsheet and getting was on suicide watch before he wasn't that day get to ask the question why was he on suicide watch that day why why wasn't there a camera inside the cell why wasn't there a cellmate what check number 3 minutes for very simple just simple questions that should be

answered and legacies lawyers asked for him to be taken off suicide watch really Yes that was one report that us earlier today has long wanted that I don't know that that begs the question why would his lawyers not want him on suicide watch which would give the Metro protection and plus he was suicidal and he really was beaten up by somebody in and interviews by somebody else in the prison one now you have to watch you put in solitary to where he can be harming himself if there are way too many holes in the story way too many and it's not okay given that the actual wrap up of of those cards that place from ABC7 attorney general William bars said Monday there were serious irregularities the federal jail jeffrey epstein took his life as he awaited trial on charges he sexually abused underage girls the 66 year-old evidence here was found Saturday morning in his cell the chronically shortstop Metropolitan Correctional center unit known for holding the Tories prisoners under extremely tight security I was appalled and indeed the whole Department was frankly angry to learn the MCC failure to adequately secure this prisoner Mara said a police conference in new Orleans we're now learning of serious irregularities this facility they're deeply concerning and demand a thorough investigation the fbi and the office of inspector general are doing just that he added we will get to the bottom of what happened and there will be accountability barge not provide specific details of an investigation by the fbi and the Justice Department inspectors general are continuing a bar also issued a Stern warning saying the case was far from over saying anyone who may have conspired with abstain should not rest easy the medical examiner called a top say Eckstine inconclusive sources said he hanged himself guards were supposed to check on abstain every 30 minutes this sell Metropolitan Correctional center ever sources say occurred call was not followed the hours leading up to his death a source told ABC News bar is livid and determined to get to the bottom of this I was appalled to learn Jeffrey Epstein was found dead early this morning from an apparent suicide in federal custody bars said the statement the stretch teen's death raises serious questions that must be answered in addition to the F.B.I.'s investigation had consulted with the inspector general whose opening an investigation into the circumstances of Mr. Epstein's death Epstein was in the facility special housing unit and was on suicide watch two weeks ago he was found unconscious in a cell with apparent self-inflicted marks on his neck this those that watch ended before his death Saturday there are many conspiracy theories and questions out why and how this was allowed to happen don't open the phone lines are To conspiracy theories don't do that for lunch to clinton body count I mean obviously a bunch of people drop dead around the clintons they have 30 or 40 years that they are not making anything up there are lists available everywhere on the Internet of the people who no longer live who worked with 30 year or around the clintons so that there's there's no argument there but to call and said Here's the do it I've asked and are you buying the official story though I think it's a fair question are you buying the official story hang himself the guards all dropped the ball no cameras were working off suicide watch Yeah we get a machine there what's the big deal you by the official story we just skeptical person watch truth at least test the say this is sketchy story dude this is not adding up to two was like kt story I really don't want a bunch of theories on what happened but isn't that easily explainable that they just suck at a facility.

I don't know that any of this happened you go again and say Hey if this person just ends up being suicide did maybe get a lighter sentence maybe dang get this is really really good food for weakening who knows there could be any number of things going I get it but at the same time I've always wondered why doesn't somebody say something in cases like this are cases like 9 11 9 11 was an inside job America did that that's the claim by some for idiots I didn't want a person who agrees with you that was affiliated with or connected to the eventually found deep throat was from the from the next two years we will eventually find out what we're not hearing anything here appear to be here Let's get him and for argument's sake Let's just saying all the conspiracy theories out there about the heat clinton and people look for a gig with them all the way back to arkansas in the I D A.D. I I am going to get only know I learn a lot of questionable will decide if you want to call it that suicide dive into it we say now Yes absolutely days had run happy future inside me a couple questions officers retired current and Doug good insight I can see somebody serving a life sentence getting something easier some better food maybe better better better to get to that would you have to run entirely opting to hound every level of the hierarchy and the President I don't think everybody can be quite like that it's interesting to me in the 9th for one pack still packs a cow we come back in a canal County noted now can see the guy guy writing these guys screwed up County arizona Sheriff Mark Lamb is going be the program for those watching on television the video starts out just fine later his voice in his mouth off the information just as good keep it here both the fbi and Justice Department are investigating the death of billionaire Jeffrey Epstein accused of sex trafficking involving a teenage girls Correspondent athena Jones has his apparent suicide comes less than 24 hours after over 1000 pages of documents containing more disturbing sex trafficking allegations against had steam were unsealed in a related lawsuit one of his alleged victims filed against one of his associates.

Hey welcome to the program my pleasure here glenn beck finely on the Olympic program it is a men's room packed is here with us to talk about they talk about these Point we don't even know I think they did not talk suicide ups over the weekend Yeah and they have determined that they can determine the cause of death yet of course I mean why would it not going to go Dan wait you have got an autopsy a guy who had to harm himself right everyone else could have done Yeah you can't determine the cause of death come on now what I heard was that they're releasing it with the fbi the fbi report so it's not just the well I a minute I listened to it was a daily or a listen to I listen to a couple of things from the left every morning Liz maybe came from maybe and pr this came from npr that the autopsy was performed and they have to determine can determine the cause of death yet I hate it I couldn't help but notice this was a guy who was a suicide watch Yeah but it had been taken off of it they do have monitors the see what's going on in this Yeah they were all pointed outside the cells I mean that's where all the action is right is just outside of the jail cell the guards were supposed to be a check King on

them every 15 minutes at home but didn't they were just tired and he was supposed to be wearing a suicide and proof that jacket it but wasn't cool a bunch of amazing coincidence is bozo and then the guy just out and the conveniently hang himself when there's nothing to hang yourself from a fairly high and win here well hillary clinton was there hillary was there in the bottom bunk Yeah really matches the bottom bunk that has I was that on npr do that I don't know which one that was okay but Yeah she was in about a month pretty sure will have only been able to get to somewhere between 40 n-400 people so that they can get the jeffrey Lord what do you think this hearing that Sandy Burger even though he's dead somehow or other got in and was trying to smuggle jeffrey have steen outing his underpants and it does was any I mean you would smother Adaptimmune advance would commit suicide if they stuck in the underpants city Burger I would assume that we don't know that well that's there's a lot of room there with all the documents and had dinner right fit right but you know you wonder why there's a conspiracy theory on this one Oh come on I don't know this is what happens when you constantly lie to the American people come audiences the you is these were there the parents of most conspiracy theory so we don't know what happened here happened no idea it's funny though the media is blaming the right approach to jump into these conspiracy theories in part this is because Trump to retweet thing but the left is a conspiracy theories going on forever they just said 3 weeks ago but guy was a it was likely be on a hit list Bowl he you down I mean who doesn't think that is possible you have a guy who everyone is saying you know everyone including the Pope had Rice sacks good when you line up of go there's a million people want the guy dead by the way we haven't seen the pope's name yet on that law Yeah I think you had not only give people like clinton and and a lot of figures on the left you also have a Trump also been thrown into the on land their get of John glenn you have also been multiple billionaires not not necessarily as a partisan figure out to you by then are on this list it's really weird.

disappointment anger disbelief Jeffrey and steams alleged victims are not mourning his death but they are shaken unless the financier convicted sex offender appears to kill himself over the weekend while in custody at the Metropolitan Correctional Center in Manhattan he was arrested last month on new federal sex trafficking charges that could have put him behind bars for 45 years speaking into Marlin's earlier today U.S. attorney general William Barr addressed reports the prison guards assigned to Jeffrey Epstein's unit were working extreme overtime in the lead-up to his staff we are now learning of serious irregularities at this facility they are deeply concerning and demanded a thorough investigation the FBI and the office of inspector general are doing just that we will get to the bottom of what happened and there will be accountability but let me assure you that this case will continue gone against anyone who was complicit with that I think any co-conspirators should not rest easy the victims deserve Justice and they will get U.S. attorney general William Barr speaking in Louisiana today tax Corolla is an attorney representing 5 unnamed women accusing Jeffrey Epstein of trafficking and sexually abusing minors reached Mr. School Allow in West Palm Beach Florida Mr. Soileau what are you hearing from your clients since the news said Jeffrey Epstein's death broke this weekend well there are multiple reactions they are worth good point good Yeah it's once again they have been cheated out of an opportunity to see carefree have speed and older appropriately accountable by the criminal law for his actions they needed certainly do not believe his passing but they regret that information that he was that make and tributes to holding of years responsible for their participation in his crimes may have died with it they're also very hopeful that as a consequence it is Yeah there may be others who were reluctant to speak earlier who will now be willing to come forward the question of how this could have happened said Mr. Epstein was previously on suicide watch but wasn't at the time of his death what's your sense of how such a high-profile inmate could have taken his own life all I know is what I've been reading and Crest reports and those Crestwood cords raised more questions and then provided answers get feed whose inexplicable to me that it is such a high-profile individual who had obviously demonstrated a pump and for key towards suicide in the past could have been the

allow me to take his own life with substantial assistance all of those p.m. in a position to have been responsible for supervising Epstein.

B_AUG_WASH_35

Accused sex trafficker Jeffrey Epstein's apparent suicide inside Manhattan jails was now being investigated by the fbi the inspector general the Washington Post's Matt Zapotosky covering the fallout over Epstein's death and spoke about with almost tailor them cice as you report bar called this a failure by the federal detention center in new York citing irregularities at that lockup need to clarify what he meant by irregularities key or not we know a little bit about what he might have been referring to one of the Strip's team should have been being tracked every 30 minutes if you look in the special housing unit of the federal detention center he had been checked down and several hours to move may he should have had help make actually had won until Friday winning Shelby was transferred out and all anyone should have been reassigned it they worked for whatever reason for those just to be irregularities the bar might have been referring to go she didn't specify when he made his remarks but Let's talk that we hear bar another saying they're going to go after co-conspirators but now that seems dead how does the case proceed can still go after those who might work with them they won't obviously be able to prosecute Epstein himself and maps disappointing to a lot of victims who were looking forward to when they faced him in court but in previous court proceedings in civil litigation from prosecutors and victims of alleged keep going to have a network of people who brought him young girls who appears so prosecutors and investigators can still explore to what extent those people might be responsible and possibly church that one suspect like this dies is likely that be no more documents would be released no one has to protect his privacy anymore I would think I think you and I think you will start to see victims go after the state you see if I'm going O battle continue but because there's still an ongoing investigation into other conspirators it's not like tomorrow we will see all of the search warrants all the court documents there's still an ongoing investigation so what about our going I think a lot of the most sensitive material for main

protector of co-owner Maddie these apps teen's death indicative of a larger problem in American prisons is hard to keep high-profile prisoners alive or is it something that's just going on here in Manhattan with this one is center if you talk to Union Prison Union official like think they would tell you that this prison may have some particularly acute problems with staffing and overworked time and guards being overworked but that is an issue you kind of PRISM federal prison system wide until recently there was a hiring freeze attorney general Bill Barr lifted that but there's still kind of you know they haven't filled the pipeline to fill some of these additional so-called prison where the other goal and then everyone should expect they should keep those Americans alive in this case they get to them and not real failure Matt Zapotosky with us on coal news from the Washington Post and greed all this coverage online at Washington Post dotcom and that's come most Taylor Grant size and President Trump is defending his Re-tweet of a conspiracy theory involving Jeffrey Epstein former President Bill Clinton he thinks it is fine he says the conspiracy theory suggests a link between Abd Dean's death and Clinton team died in an apparent suicide this weekend and pressed by reporters in New Jersey Trump asked whether Clinton ever visited Epstein's private Island said the former President so on Epstein's jet many times Trump trouble gunships Epstein's jet.

we took a look at the news and we said Jeffrey Epstein mean committed suicide and we can look to each other and said no he didn't I think that this was something else entirely I checked out with Tracy Danes who is editor of Uncovered D.C. Tracy good to have you back on the program polite thank for having me back so Yeah this evil pedophile Jeffrey Epstein who managed to avoid justice for a long long time because of reasons I don't think we fully ferreted out as to why he got House arrest in 13 months a lot to go to his office in the daytime have sex with more underage girls allegedly while he was under Super vision and then goes to egos into federal custody he's actually going to see the inside of a courtroom and maybe some of the victims will get some Justice and he is said to have attempted suicide a few weeks ago so they put him on suicide watch and then amazingly they taken off suicide watch him put him in a regular cell with a bunk bed a convenient place to Thai news and then he is said to have committed suicide should we believe that that line I don't think anyone really believe that at this point because there are still many questions and being that just went wrong at the exact right time can make that he probably won't get the truth it quickly they like you made a lot of really good point there especially you know about taking off your back watching if more information comes out there now the report saying Med with his attorney who asked for that to happen there's proper procedure that need to be gone through you know the one to meet with Kyle 3 weeks ago and now all of that next award I'm though it really boiling piling into and situation unfolding and we're not really getting the troops from anywhere the Kaine left to fend for herself here I mean are we are led to believe that the federal corrections system this was the Manhattan you know agency run by the federal Department of Corrections the that there are so incompetent that they would take a man who had been on suicide watch and I've I've read plenty of former corrections directors who said one should put somebody on suicide watch the only reason you take them off is if their circumstances the things that might have

made them suicidal change dramatically well none of his situation really changed in the last couple weeks and yet they taken off suicide watch and then for some reason the guards they're supposed to do just routine welfare checks every half hour miss for a couple of hours and it's in that in that little window of time a couple of hours then he allegedly kills himself push yet every 9 minutes there's supposed to be checked Danone and noticed a man with awaiting a decision on the appeal that he filed Burke released on bail funnyman someone like have the gavel plan down yet.

questions are mounting in the case of jeffrey epstein's apparent suicide. so the new york post reports the guard on jail where epstein was held on sex trafficking charges was a substitute not a regular corrections officer this week attorney general william barr criticized the detention center citing serious irregularities at the lockup. but others blame the trump administration given the center was reportedly understaffed the government was responsible for maintaining his security and safety. and that's a failure that needs to be completely investigated to see how this could have happened while the fbi has raided epstein's property on the virgin islands as it continues its investigation. and the house judiciary committee has also launched its own investigation. it's outlined several questions for the bureau of prisons to answer.

The fallout from Jeffrey Epstein's apparent suicide in new York federal jail WCBS-TV reporter jessica late attorney general promised a thorough investigation and this is really just the tip of the fallout from this apparent jail cells suicide the Department of Justice confirming late this afternoon the two guards were supposed to be keeping a close watch on jeffrey epstein had been placed on leave and the warden of the Metropolitan correctional Center has been reassigned at least temporarily the fbi is pulling out all the stops to investigate the death of the accused sex trafficker CBS's Pat milton has more tortured and killed a baby it clear that the fbi has begun reaching out to begin the process of interviewing officers and for that at the Metropolitan Correctional Center in Manhattan as part of its investigation into the death of Jeffrey F teens found dead from an apparent suicide.

We introduced you to the news spokane county jail director michael barbers both with crime duty and say about his new position during the first part of that conversation. barber gave us a better idea of his law enforcement background and now we hear from him about inmate medical care and possible changes to prevent drugs from entering the jail. here's part two of that interview. as a director what kind of change do you want to make to the spokane county jail. so some of the changes that i want to make immediately i want to improve our supervision over and over the staff and over the inmates and improve that area. we're working plans to do that. that part of it is necessarily hiring new folks is promoting folks but then and increase that promotional ladder to give opportunity for the staff. so you said at a news conference or earlier this year that narc has been used a few times by guards on inmates. is this more than that's been used in previous years. i can't really say if it's more than what's been used in previous years. there was 50 application this year to date and some of those could have been a multiple you know administered on one particular offender. do you think that the usage in our can will rise in the coming years. well i think it will. until we get a better grip on on the overall problem in the spokane region we have a better understanding of you know the addiction and deal with the direct addiction firsthand all right so you also about drugs entering the jail are their job plan changes coming in the next few months to either curb or stop the problem of drug entering the jail. the board of county commissioners have been really vested in this. this issue we're facing of contraband getting the jail. they've been very supportive. they've allowed us to fund one body scanner for the geiger facility one for downtown along with a mail scanner that would detect drugs coming in on parcels and those type of things and then we've also ramped up our cell searches upstairs and involve canine to help us do some of those searches. what policies you haven't place or maybe any changes planned to prevent suicide deaths suicide is a big focus of ours as well. we've totally revised our policy on it and the ways that we're handling we've had our staff go through additional training on suicide prevention and what to look for and those type of things. and then we've replaced the bed sheets with some heavier duty smocks and some coveralls to try to ward off some of that. and it's just observation we're doing 30 30 minute rounds. we've been stalled 30-minute round clocks and all of that. the floor is reminding rs is time to do the rounds all right. so could you explain or give me an overview how the medical process works or an inmate needs or requests medical attention. first off we have a contracted medical service out of naf care it is provided wonderful service for us initially when you come in you will be given a screen by a by an order and to ensure that you're ok to come to jail and if not you go to the gym. you know whether it be involved in an accident suffered a head injury or one of those type of thing we're going to do our very best to make sure that you have your medical attention upfront before you come to jail. then once you come into the jail you undergo another more in-depth conversation with the medical staff with gets your background and medical information from you. and then once you're up on the floor. and if you're under medical attention or nurses do a really good job of coming to yourselves.

new development in the investigation of Jeffrey Epstein's death in a new York city jail. investigators are looking into whether the guards tasked with checking in on him were sleeping on the job. Epstein had been taken off suicide watch, but guards were supposed to be checking on him every 30 minutes. NBC news reports, two sources say there are questions about ether the times were recorded further checks and if they were faked. both guards assigned to his unit had been placed at this point on administrative leave and the warden of the jail has also been reassigned.

today - the first lawsuit after jeffrey epstein's apparent suicide - alleged victim jennifer ah-roze saying the accused sex trafficker sexually abused her when she was just 14 - "today i am starting to reclaim my power." ah-roze - suing epstein's estate and several of his former associates - naming gislaine maxwell as his enabler and three unnamed employees. "they robbed me of my youth, my identity, my innocence and my self-worth. for too long they

escaped accountability. i am here today because i intend to change that." the suit coinciding with a new york state law-- that went into effect at midnight - that makes it easier for alleged victims to file lawsuits over sexual abuse. also today - stunning new details that reveal major security lapses in procedure the night jeffrey epstein died. sources familiar with the investigation telling abc news -- a review of camera footage inside the metropolitan correctional center manhattan - showed the guards failing to make some of the required checks on epstein's cell the night of his death. two guards tasked with checking on him - who are now on administrative leave - suspected of doctoring log entries to show they made the proper checks - when sources say they did not. attorney general william barr - ordering major changes - president trump weighing in - calling for a thorough investigation. sot - trump "they're saying they want an investigation. i want a full investigation. that's what I absolutely am demandning." (trump) megan out: abc news has learned the two guards who were supposed to be watching jeffery epstein the night of his apparent suicide have not yet been interviewed by investigators. an internal investigation by the bureau of prisons is happening now -- this is fairly common practice in these circumstances.

a new rule by the fcc could make it easier for them to protect you from robocalls and also punish the callers even if they're overseas. the fcc says they receive more than 30,000 complaints about robocalls just in the first half of this year. those calls can often have devastating consequences as in the case of angela stan neck's other who lost hundreds of thousands of dollars. she testified before congress to share her story. >> it is extremely hard to imagine a loved one committing suicide, but she did. because these individuals preyed on her and on her good heart. >> the fcc has responded now helping phone companies to block robocalls in advance. also using newly granted authority to punish offenders, especially those outside of the country. congress is also taking action passing bills to increase penalties and require service providers to use call authentication at theing nolg. they hope to get the president's signature before the end of the year.

new details coming in about the gunman. >> this is just terrible. it doesn't happen here. >> a shocking crime next door. >> it is just disturbing, live on the scene as neighbors learn the disturbing details. it is a shocking crime that rocked this neighborhood filled with retirees. >> it appears a son shot and killed his elderly mother before taking his own life. kara kostanich joins us live from des moines where it all happened. >> reporter: that's right, molly, eric. police said she left for hours right underneath this apple tree in the front yard of this house and they indicated that this was his intention and to take his mother's life and her own. >> they did come here to check on this residence. >> and it was an elderly mother and adult son. it was an apparent murder suicide. they found a suicide note and a gun in the son's hands. >> this is a great neighborhood where nothing ever happens. >> reporter: but no one had been living at the house for years. motor homes, much more. >> and they were here the other night arguing. as they were leaving, they only stayed half an hour. >> reporter: neighbors say that's the only time that families visited the property. overnight to mow the lawn while folks are saddened over what happened. they hope this property will soon be cleaned up. >> i can't believe it that it is too close to home. >> i want to take you to a picture of this yard right now. neighbors tell me they have been calling the city for years, trying to get this house cleaned up. the sale boat has been here for more than 30 years and because the lawn was mowed and licensing we're told, no thrills here, that they were never able to do anything. we have not yet learned the name of the son and the mother. live in king county tonight, i'm kara kostanich, komo news.

Aug 14 • 5:35 PM

Let's catch up now what we know and what we don't about the circumstances of Jeffrey Epstein's death this past weekend the disgraced financier and convicted sex offender was found unresponsive in his jail cell one apparent suicide since then troubling details have emerged about the jail attorney general William Barber has opened an investigation into the word has been reassigned and two guards who were supposed to be monitoring steam have been placed on administrative leave for joining us now with the latest is Danielle Ivory of the new York times and Daniel Justin what is the latest you have been able to learn about what was happening in that jail in the hours leading up to the scene staff well we have learned last night two staff members were working in the special housing unit where jeffrey epstein apparently committed suicide it looks like they may have been sleeping during their shift they were supposed to be checking on Mr. Epps steen and other inmates in the special housing unit every 30 minutes that they were not doing those checks these are the cards I mentioned have now been placed on leave that's right so one of them was a full-time Correctional officer the other one was actually no a Correctional officer although he was a former Correctional officer he was someone Hue had a deferral the prison now had volunteered for overtime to get smacked Sir Hey as a Correctional officer you also reported that there's some evidence they falsified records saying we checked don't even know where your reporting shows maybe they were asleep we did hear that friend from 3 government officials that it is thought that they falsified records to show that they had been checking every 30 minutes when in fact they have not that would be a crime right false entries an official blog that could be a federal crime Yes have seized two guards commented or his Union said I think the two guards if not commented as far as I know I've heard from some Union officials that they feel it's unfair that the staff members that were working as guards seem to be getting most of the blame for what happened and they think that management is a couple here as well I know through your reporting and others that and federal prisons across the country are suffering staffing shortages it and can you just speak briefly to the pressure is on guard at including this facility to work overtime absolutely so when we did the investigation about a year ago we found that people were working in incredible amounts of overtime life-changing amounts where they couldn't hold relationships together because they were working so much overtime what happens when you're working and when these federal prisons where staffing short is that you might working 8 hour shift as a Correctional officer and at the end of your chef before you can leave your calls you don't work an 8 hour shift and if you refuse saying you can be written up for it no or be fired so most people do not refuse say on the do it and then you go home and you only seat for it maybe like 5 hour is and he have to go back to work it does is give some context to why the guards without justifying anything explaining why guards my fall asleep exactly you can understand how it's possible for guards to fall asleep foror several hours on the job without it being a conspiracy theory it sounds like they were real problems in terms of the way that jeffrey epstein was being held is there anything you've been able to find your reporting that suggests he was being treated in a different way from other people being held at the facility orders to speak to a wider staffing problems or management problems that occur Trump so they it does seem to echo problems that I seen other federal facility is it doesn't stand out to me except that jeffrey I've seen such a high-profile figure but

there's been no evidence so far that I've seen that he was Denny Hamlin a radically different way. Yes exactly as Danielle Ivory of the New York Times thank you so much for talking with us.

they really hard to do bungle these conspiracy theories about the death of Jeffrey interesting because this guy was the powerful people he could have exposed he lived if the reasonable people who usually tried to debunk this stuff find it naive to accept that he just up and killed himself but yet to have a President who loves to retweet conspiracies you begin to think that the bunking is to trial Russia wins again but the more I think about it the more I believe the Trump factor might actually help here because it means that everybody is going to try to catch his attention with their pet theory but crazier the better like for example is up steam really bad more after the potion where soft as you wake up unzipped the body bag stake across the GW be a deliberate airport and fly to the private island we don't know about not by the way is not an actual conspiracy I just made that up now but of millions of others reach for similar levels of absurdity in hopes of earning a presidential Re tweet it might flood the zone and flooded with so many conspiracy is that when last we get to the ball to mundane truth people might actually excepted for change just to be able to get on with their lives.

Everyday ... someone loses their life to suicide. in our community ... it's becoming a crisis. while it's an incredibly difficult thing to talk about, not only for media organizations... but for all of us in our personal lives... we need to... to show people who are struggling or have struggled ... they're not alone. that's why nbc5 launched 'in this together.' tonight ... we're meeting jacquie farr... she lost her father to suicide when she was 17 years old. then ... just last year ... her nephew took his own life. shes sharing her story with us tonight and how she tries to spread positivity to those that need it. jacquie farr knows all too well how suicide can effect your life. in 1980... when jacquie was 17 years old ... she lost her father to suicide. "when my dad died it was just like quiet thing and its like myself and a couple relatives were at the funeral and you just 'shhh'." she said when it happened it was especially hard because no one really talked about suicide. "people treated you not only like a freak but there was such a stigma and it wasn't accepted." and... like many people who've lost a loved one to suicide... jacquie never saw it coming. "i had no idea, i was young i mean he didnt seem sad and back then you just didnt really hear about depression." as if losing one person in her family to suicide wasn't hard enough ... last year she lost her nephew. "38 years later my nephew does the same thing and i just really had no idea he was so loved, everybody loved him and he was such a good kid." but even through her tragedy ... jacquie's finding ways to help bring people joy. not long ago ... she sent me these rocks ... 'it says 'in this together' and i thought i can do this, i can do this i can be in this together" jacquie's been painting rocks like these and dropping them around the rogue valley for years. she hopes they'll bring happiness and love to someone who needs it. her message... "this too shall pass. on the rocks i wrote the semi colon because its not an end its not a period, its continue on" that was blakely mchugh reporting... we want to be able to share other people's stories like jacquies in the hopes of truly showing people that are struggling ... we are in this together. if you'd like to share your story with us ... email us at: in this together at kobi-5 dot com. if you or someone you know is struggling with thoughts of suicide ... you can call the national suicide prevention lifeline at 1-800-273-talk. the 'in this together' campaign kicked off today with a meeting at our downtown medford studios. agencies involved with the campaign gathered to talk about the next two years and how to get the conversations started on suicide. it's happening all too often in southern oregon and northern california. attendees included everyone from mental health professionals to local police departments and other non-profits. "this is so important because three years ago a fourteen year old said to me 'i don't care how many of us you graduate. how about you keep us all alive?' and i think when a fourteen year old looks you straight in the face, you better do something." the campaign will last two

years and hopes cover a variety of topics from prevention to resources in the area. 'in this together' hopes by starting these conversations, it will be able to make a lasting change in the community.

Let's say Jeffrey Epstein was left alone for more than an hour this is your beat theory misses be here ABC one review nothing else just added to the coup up poorly run the government prison and the guys screwed up because he had been working fired 15 hour see on the guy's got messed up but it did the system does Yeah it's just you know crying he vomited okay Yeah that's a day Yeah thee is extinct paid somebody he listened and look the other way I read about an hour to kill myself right and made 8 he takes a bunch of cash gives it to the guy and often and as he left alone they ordered take his own life see clinton Trump prompter sure it's the Gershwin you name it and I was one those guys had him killed off Yes okay so it could be a combination of dnc this new news as the path the broken bones in Jeffrey Epstein's neck more often happen due to strangulation then do suicidal paying a hot what I hear from my Fox medical you know I've had his credential than that being fractured and other fractures in the neck make it more likely that Bill clinton did I and again this is a percentage coal more likely that was a homicide and suicide but it can be both it can be I would rather they can either be a

suicide or a homicide still hasn't been confirmed I am now more suspicious than ever that this could be a homicide number one because of the bones that answer is going to come to spill because if someone is attacked you see signs of the attack on the body that has been discussed yet it hasn't been released yet I'm waiting to see that someone hold you down and strangle you use seeing evidence on the body up Yeah everybody knows that but it could be John a combination of the dnc he could have paid somebody to don't done that would he be giving money to look the other way and then pay a guy coming in.

we're learning more about the death of Jeffrey Epstein in Manhattan lockup initially called a suicide although old conspiracy theories question that's ABC aired at her ski joins us now on the news line from new York and aaron what can you tell us about what the autopsy found so far there's a broken neck bone with jeffrey epstein had sustained as he hanged himself with a bedsheet in his cell taylor that's fueling speculation that maybe he was strangled to death but also consistent with the way that that team appears to have killed himself and so far investigators tell us that there is nothing to suggest this was anything other than a suicide as I understand this and in particular bone that was broken in at Steans neck also came to light in

the Eric Garner investigation the man who was killed in an unsanctioned stranglehold by NYPD I realized I would but you have a right and Adam's Apple no forensic expert so I would divert to two experts so sure if you could break it if he could go or choked to death but also if you choke yourself to death so I don't think it's out of line with what I hear from experts and medical professionals would there be a good move but the beam self-inflicted and again so far there's no evidence to suggest that anything other than Jeffrey Epstein taking his own life but still at this point the medical examiner hasn't come out and said that is the for sure cause rain they had not said publicly they say the reason for that is there waiting for additional information from the federal investigation is still ongoing and the medical examiner's office said it's not unusual because they would want to know if there are any pictures or videos and witness accounts that could bolster their forensic findings and so once that is complete we expect the medical examiner's office to release the cause and manner of death and in that federal investigation we learning anything new today any prisoners saying I heard something we saw something media plead guilty I doubt I believe he goes on the cellblock are being interviewed we know the guards are being interviewed today and so they're going to get a chance to tell their side of the story after they've been blamed for failing to adhere to protocol but says had steel and others that inmate should be checked every 30 minutes for that unit so if there are witness accounts we can be helpful to put a fence the contending to incorporate that into their investigation.

Erin welcome back to the show market ended the year autopsy results still not been released by the medical examiner's office here in new medical examiner's office here in New York pending York and in additional information from the federal federal investigators were looking at investigators were looking at in depth that Adams human haven't we learned at in death that he broke one of his neck bones but highly both Own which is right around the Adam's Apple if you Own which is right around the Adam's Apple if you can picture that and can picture that and that's consistent with that's consistent with strangulation murder or Gore joke or something with strangulation murder or Gore joke or something like that and at like that and at this point investigators say there's nothing to suggest that the teen died of anything other than the suicide and we know that he used bed sheets to to hang yourself but yourself himself an assault okay women they say there's nothing to suggest okay women they say there's nothing to suggest there was anything other than have half hanging seat he banging seat he hanged himself but this is the kind of bone is broken when somebody puts a somebody puts a choker around your neck with her and then look to the with their at it and looked at the bit know it it could be consistent and I no apologies know it could be consistent and I no apologies so I'll leave it so I'll leave it to wanted to forensic experts but you know a lot of you know a lot of speculation horses pawed at did somebody kill him speculation courses for it or did somebody kill him or did Hillary Clinton walking was selling murder Jeffrey being because sound but the cash but because I'm not but the cash but be need at this point the authorities be need at this point the authorities say there's no evidence it was anything other than the suicide now 5 days later that the Justice Department and Bureau 5 days later that the Justice Department and

Bureau of prisons cannot come out of prisons cannot come out and say that there's no and say that there's no evidence of evidence of homicide I don't is it is striking to me even though we I don't is it is striking to me even though we continue to be told by law enforcement officials that you have to be there's nothing to suggest that you have to be there's Jeffrey Epstein died of anything other than well if somebody attacked I guess if you were sure choked there would be hoped there would be signs on his body and there Besides attack camera footage of somebody went into his cell at this point we don't have that so the only thing we know that the camera shows that the guards failed to make their appointed rounds in a 30 minute intervals as required by protocol now the they did the lingering question is was Jeffrey Epstein left alone on purpose or was it just a colossal failure by the Bureau of prisons almost journey to wales a godfather to order that scene was good that's an interesting thought to their to their were cameras in the hallway I would normally be cameras in the cell looking at the prisoner and in some circumstances only if he had been on suicide watch and we know from law enforcement officials that he was taken off suicide watch July 29th 6 days after an incident that still hasn't been fully explained actually the judge who is going to oversee and steam trial wrote to the Bureau of prisons and steam trial wrote to the Bureau of prisons about this and said Hey about this and said Hey that July 20 third thing we esteem we're at scheme went to the hospital with marks on went to the hospital with marks on his neck he still haven't fully explain lower ballot about he still haven't fully explain what that was about whatever was a tenant the hospital briefly and he was put on was put on suicide watch suicide watch Daddy was taken off suicide watch and I think it's still a good deal of curiosity about why that decision was made we know would have required psychiatric evaluation to and we know that the deputy attorney general Jeffrey Rosen was informed of the decision and add the fact that the corner still has released the full report yet we're just getting bits and pieces thanks here investigative reporting and but what we see them the full report probably in conjunction with the federal investigation the medical examiner's office says they're not being cagey here that it's common for being cagey here to want to know...

more about Jeffrey Epstein's suicide which I'm big into probability and I would say the strong strong likelihood is that this was not a suicide so nobody had committed suicide in the Manhattan jail for 30 years this guy was in isolation after being identified as suicidal 3 weeks ago he was taken off suicide watch just two weeks said earlier he it over Cabrera's malfunction so we have no video of what happened in his cell those guards were supposed to check on him regularly fella slate and the doctor the lines and now the autopsy has come out and there's a broken bone in his neck that almost always is Associated with homicide strangulation homicides now in 6% of Hangings this bone breaks so there is a 6% chance just based on the autopsy that it was a suicide lacked when you combine that Bowl and it's usually associated with strangulation homicides you combine that with the cameras malfunctioning the security guards supposedly falling asleep just being taken off suicide watch the were screams heard in his jail cell the morning of his suicide squad reaches or heard is cellmate was moved out of the day before this one a suicide there are a lot of powerful people he could tell stories about these powerful people having sex with underage girls and by the way did you hear that after he had been arrested and done time for heard sex with underage girls the heroine's fly on his plane bill gates bill and we don't know why and they the claim insurers that abstain tried to pass himself off some kind of a lamp for best but if you're bill gates wouldn't share vetting process tell you not to get off on the private plane of a guy who's been convicted of having sex with underage girls I just I find it to be any incredibly disturbing lack of judgment by bill gates they say it was to discuss Fulham for paying this is CNBC say that is reporting this bill gates spoke with Jeffrey Epstein more than once to discuss ways to increase philanthropic spending knowing that this is a guy who served a sentence in 2008 for a listing an underage girl from bill gates stay billion miles away from this Yeah it's very where it's very weird story.

klamath jail suicide attempt-ots an inmate held in the klamath county jail is in the hospital
tonight. the sheriff's office says he tried to kill himself. correction's deputies needed to give him
c-p-r to revive him. the man is facing disorderly conduct, harassment, and criminal trespass
charges. he's currently in the intensive care unit at sky lakes medical center. the klamath county
sheriff's office and the klamath falls police department are investigating the incident. medical
examiners have completed an autopsy on jeffrey epstein. it shows he has "multiple breaks in his
neck bones." according to the washington post- the broken bones are consistent with epstein
type of death. epstein was placed on suicide watch last month after an incident in the jail. he
was taken off suicide watch in late july after he was given daily psychological assessments. two
prison staff members who were guarding the unit where epstein died failed to check on him for
about three hours the night he died. that's according to the new york times. suicide hotline-
wipe fs there are plenty of resources available for you or anyone you know who might be
contemplating suicide. you're seeing the numbers on your screen right now. you can call or text
those numbers any time to reach someone that can help. fcc new suicide hotline-ots the

federal communications commission is working on a new nationwide suicide prevention and mental health hotline. it would be a three-digit phone number- like a 9-1-1 for mental health. senator ron wyden has been pushing for the new hotline. oregon's suicide rates are higher than the national average. suicide kills more than 800 oregonians a year. senator wyden says it's a public health crisis.

tonight---there are new details about accused sex trafficker jeffrey epstein's final days in jail. the medical examiner ruled his death suicide by hanging but now his attorneys say they'll do their own investigation. nbc's kathy park reports. tonight--jeffrey epstein's attorneys fighting back against the medical examiner's ruling that their client died from a suicide by hanging... writing it is indisputable that the authorities violated their own protocols. the defense team fully intends to conduct its own independent and complete investigation "they're also prepared to take legal action to obtain videos that may show the moments before epstein's death. cevallos sot: the metropolitan correction center will respond to subpoenas, but they require a written authorization from the client. in this case, that's a little complex because the client is no longer living. friday's autopsy doesn't diminish the probe into how this could have happened to a high profile inmate, who should have been checked by guards every 30 minutes. one of many questions---magnified by startling new details about the conditions in jeffrey epstein's

manhattan jail cell.....reported by the new york times...di: .we talked to attorneys who've said that their clients papers often get eaten by mice.there's often standing water sometimes with feces or urine.the new york times interviewed law enforcement, lawyers and bureau of prisons staff---who spoke about epstein's habits and attempts to extend his wealth even behind bars.di: so he would spend almost every day, with his lawyers. usually would be 12 hours with his lawyers and then he was outside of that, trying to put money in other inmates commissaries so that he could, we're told so that he could try and buy protection.sources telling the times....the one of many attempts to lessen the misery in jail.(-- anchor tag --)two more victims have filed lawsuits against epstein's estate and an unnamed recruiter...claiming psychological trauma for the alleged abuse, that happened 15 years ago.

3 more women today filed suit against the estate of the late financier and convicted sex offender Jeffrey Epstein ABC aired in Turkey joining us on the KOMO news live with details and these are the first lawsuit geren since we learned some details about will Epstein just two days before his suicide and maim name is a state as they try to get money from the 577 million dollars' worth of assets but that team put into a trust arranged seemingly two days before his death by suicide did sell here in manhattan will was signed by an attorney who was also on the defense team of the tourist drug Lord joaquin El chapo whose mind when know when I talk to her she she declined to comment on the circumstances of her Association with that team but was one of the last people to see him alive and debt will you think might have been an indication to have him on suicide watch or well drafting up with old isn't necessarily we don't assess the tape suicide watch but it is yet one more sign of perhaps where we're at 18 was back in again maybe the lawyer who signed it did not discuss his state of mind how he seemed nonetheless be he will Us 577 million dollar's worth of assets to mention days surviving brother Mark Epstein whose been launching his own investigation into the death and it did not specifically name any beneficiary of the trust but by putting all the assets in a trust a dozen sure degree of privacy and now these 3 women are going after the state and to the women who are claiming they were coerced into having sex with him while he was on work release from jail yet this is an allegation that two of the 3 women made and it today it is disturbing allegation we've heard before from a lawyer but this is the first time women have said publicly and conquer ties to and him court documents they say that wall have steen was on work-release from the £ Palm Beach County jail after he pleaded guilty to state sex l'm charges in 2008 they were flown to his Florida office for the sole purpose of of of the sexual encounter that that if true will only add to the suspicion of the work-release program and Wyeth he was allowed on the first place and whether it was properly supervise them up now before both the state of florida and Palm Beach County which both investigated one of them says they recall him wearing an ankle monitor Yeah one of the women said they had sex while he was wearing an ankle bracelet and opened taken of his work really is and now what we know there are a number of existing lawsuits and then and yet more women may 8 opted to step forward if they they think they can get the measure just this because in the

absence of now a criminal prosecution of that steam bed that maybe the only way to beat to get there are allegations aired in a court of law are his assets safe now that they've been given to the brothers in their antitrust part that can be accessed I believe in in the certain lawsuits with the state specifically named crown to be on the hook for forever Steen alleged conduct that that perhaps that would open up the state to use some financial burden.

new lawsuit has been filed accusing Jeffrey Epstein of rape or other forced sex Sachs Re new accusers are taking aim at the estate of Jeffrey Epstein including two women who claimed they were coerced into sex to that scene during his work released back in 2009 the alleged incidents took place at his office and his home while it seemed was even wearing an ankle monitor ABC is lindsay Davis and steam died by suicide Manhattan jail where he was being held on sex trafficking charges

so that could include that point to a threat to themselves that could include threat of suicide and obviously could include a threat of violence against other people stackable better we've been through different permutations of these kinds of laws to reduce gun violence for a while it was an assault weapons ban that is now gone we have zero taking action against both stocks after the mass shooting in Las Vegas there was a lot of talk at the Sandy Hook about what should be done nothing got done after the shooting part of florida florida passed a bunch of laws what about red flag laws was there a moment when they got kind of pushed into the mainstream Yeah you said after parkland in particular so as I think you have the top 17 States and Washington D.C. have versions of these laws now I believe it was 8 States passed these laws in the wake of parkland in March 28 teams over the last whatever that is 16 months or so these have become more and more popular in fact after parkland President Trump himself pushed states to pass these laws many of them did including florida brian emailed we don't know no laws set of laws can guarantee absolute safety from gun violence but if red flag laws as well as background checks and limits on high fiery guns and magazines can stop even one mass shooting or even save one child's life is that not worth some inconvenience journey I think that's kind of the debate is at what point the inconvenience becomes unconstitutional I mean the Supreme court has ruled that the second amendment does guarantee your individual right to carry 8 personal firearm for your own self protection Yeah that's right that was a big ruling of the Supreme court 4 4 along the report has historically shied away from second many cases that wasn't a big one clarification there so they Inc the question is juggling personal freedoms us communal protection and the question of course how you define inconvenience like is inconvenient to take guns away from somebody or is it unconstitutional but Where's the line that's right now that's the question and the Supreme court has shown a willingness to perhaps take on more second amendment cases now it's more right-leaning think we expect some further definition clarification from the Supreme court in the coming years but right now it is interesting kind of murky area this is a broad overly broad question asked how I gotta ask do red flag laws work how we assess be successor viability of these laws of course it's a complicated question what we have so far in terms of research points to the fact that these laws may reduce suicides Indiana and Connecticut are two of their first two States to pass these laws them the most well study and a couple different studies point to a reduction in suicides firearm suicides in those States now I don't think that's not important or real suicide make up about 60% of gun death in this country so that's very serious 66.6 0% nearly two-thirds so there often these red light laws are often talked about in terms of mass shootings can they prevent mass shootings until yesterday the answer was mostly low we don't really know what yesterday there were some new research came out of the University of California Berkeley that that study California law in which there were a handful of times about 14 times when California authorities confiscated weapons under the States red flag law specifically to prevent mass shootings the research found that in those 14 cases none of those people went on to harm themselves or others so is there a little point there it's possible did anything about the research for your team did it surprise you in terms of so many americans even gun owners supporting these kinds of

laws that's right enemy found 77% of Americans support the family initiated extreme risk protection order 70% supported laws these laws are initiated by law enforcement that's a huge majority when it comes to gun issues where there seems to be almost no compromise was particularly interesting was support among gun owners we found two thirds of gun owners in this survey support orders that initiated by family before I let you go speaking of no compromise what about Congress was the conversation like there is this stand a chance of moving forward with a very hot topic right now...

He repeatedly raised his pistol to his head yelling I am done this is how I'm going out to amanda I heard that too and another threat he wanted to be taken now he announced the officers I want you to take me out in other words suicide by cop at one point they all heard a single shot back in the Woods and silence I did scream we all scream for net has Yeah Yeah that that Mayer herself up there was relief she says when sean started yelling again the standoff for negotiation went on for nearly two hours in the end he gave himself up was disarmed and taken to the hospital for mental health screening he faces misdemeanor criminal charges so he chose not to challenge the extreme risk order to avoid complicating that case last image declined to speak with me on the advice of his criminal defense lawyer despite all that happened that night sean girlfriend amanda bar forces taking his kind of length is not right she's confident he poses absolutely no threat obviously much sean it was not okay Hey anyway and he has answered to the consequences I do not feel on that man should have to relinquish his second amendment for on many because of this talk to prosecutors and law enforcement officers in Vermont and they'll tell you the red flag law has proved most useful in cases like this one where someone poses a risk of suicide Vermont has a higher rate of suicide and suicide by gun and the national rates in cases like these police chief says this red flag laws are an important to look it doesn't always have to involve a person committing a crime it can just simply be a person Let's say who's experiencing a mental health crisis involving a weapon where they are just threatening harm to themselves suicide Prevention wasn't a catalyst for Vermont's red-flag lot O that law came as a direct response to the threat of a mass shooting at a local high school likewise the recent mass shootings in El Paso and Dayton have jump-started red flag bills in Congress but David K help the States attorney for Orange County is dubious I don't for a minute believe that red flag lies we know in any meaningful way interrupt the epidemic of mass shootings in this country to do that Chao says would require a different much harder conversation the tough part is that I can't think of a way to solve the Of without amending the constitution I'm not suggesting that have languished rewrite the second amendment I don't but it's worth having a conversation about our modern weapons the 18th century document and what we can do to honor our history but also preserve life for ourselves and future generations case no himself a gun owner and we're not having that discussion but we should was to block it was inking to all things considered

A local theatre-based company could use your help! "curtain call for all" is a suicide awareness program at lcc who is trying to become a non- profit organization. in our project safe family - they are using their theater abilities to help give training programs for crisis response. as part of their fundraising, they are holding a theater play this friday and saturday called "lighting the darkness: stories of suicide and carrying on" it starts at 7:30 and consists of three ten-minute acts about suicide. But that's not all!. the event will also offer a sound healer, guided mediation and a silent auction for gift certificates, gym memberships and ems tickets. william ford/ executive director of ccfa says "and until we can more comfortably talk about it and have these conversations that people aren't afraid top bring it up and aren't afraid to express their feelings about it, we're never really going to find those answers so our main goal is just to have people walk away from here with conversation starters and have the ability and the ability to talk about it" tickets are free at the door, but they are accepting donations. doors open at 6-45 for the auction. the event will be at the blue door theatre on l-c-c's campus.

steen clinton's body and pedophile was found dead hang allegedly is in his jail cell by suicide and was on suicide watch because you try this two weeks ago I'm here to say I'm skeptical I was so guys suicide watch and day at a prison in Orange jail in Manhattan just ends up doing it anyway like to go to events Alaska installed to be high enjoy doing first time Let's call O of living the dream my friend glad you called it would happen I got up off for fear if I'm allowed to name met with a couple one fact is flying here about the situation in what's the name of the store what has been a source ABC news not go gut call okay that's ABC news you can use it was placed on suicide watch following the July 23rd and for their fine with that of gone on food 5 walks at the time of his death ever reporter she except for the ABC report the you're talking about says he was still on suicide watch ABC knows for what what what paper conversational purpose for maybe fees correct in his pocket with the corner of the end when the report comes I would like to know who it was they took off suicide watch that's true because there's no way I have two weeks ago tried to kill himself in a high-profile case like this wouldn't take it off it's interesting looking up.

you probably can't watch an action movie or a tv crime show and not see people getting killed. of course, they're actors and they're only pretending. but, still hardly a day goes by someone die on screen. that we don't see fortunately, it's rare to lose someone in real life, but it does happen and while we don't like to think about it, there are times when someone we love will die and we'll feel that pain of loss called grief. how to cope with that grief is the subject of this next report. - i lost a pet a couple years ago. it almost felt like it wasn't real, like you wouldn't believe something like that would happen. - about two years ago i lost my grandfather to cancer and it made me feel very upset through school a lot, and i wasn't able to get because i would always be thinking about him. his picture hanging in my room i have and i have a poster that says, always in my heart, always forever my world. and i have a little, i have like the birthday cards he used to send me, the christmas cards, i have everything. whenever we drive passed his house i still see him and it kinda messed me up emotionally, because i always still miss him. - no question about it, losing someone we care about hurts and it can hurt very deeply for a while. people experience grief in different ways. for example, they may feel it's hard to eat or even breathe. they may feel tired a lot and unable to focus. rtunately, we eventually get over our grief and life returns to normal, but the more you know about grief the better you'll be able to deal with it. whether for yourself or someone else. to help us with that is author and grief expert, megan devine. she wrote the book, "it's ok that you're not ok." welcome. - thanks for having me. - adults believe that they usually know what's best, but you believe that teens are often more skilled than grown-ups when it comes to grief. can you explain that? - sure. so i think grief is another one of those times where kids actually might know better than the grown-ups. one of the reasons for that is that i think that teenagers are much more comfortable talking about weird or uncomfortable things. sometimes, i think the grown-ups get a little worried. they try to jump in correct things or cheer you up and give you advice or and that's not really the way that grief works. - yeah, when a person is grieving they often get advice, especially advice they didn't ask for. how do you recommend teens deal with that? - unsolicited advice is everywhere. it's a really big deal inside grief, because we're so, kind of, weirded out about pain or sadness or anger or suffering or any of those things. experiencing that stuff, so if you're most people will jump in and tell you what you should do about it. you should write about it, you should remember that somebody had a great life, you should try smiling sometimes, right? all of that is unsolicited advice and it's not helpful. one really good thing that you can say back when somebody gives you unsolicited advice is to say, i actually don't need help with that one. it's much more helpful if you just listen to me instead of correcting me. - i can relate to that. so grieving is normal, but how do we know when grief isn't normal anymore? - that's such a great question. about grief in this culture, because we don't tend to talk nobody's really sure what's normal and what isn't. the big thing to remember is that just because it feels uncomfortable, doesn't mean there's anything wrong with grief. grief as a whole is really normal. the only time where you might wanna make sure in with somebody that you're checking is if you're feeling like harming yourself or harming others. that doesn't mean that you're suddenly abnormal, it just means that you might need what you're going through. some extra support processing - what should we do to get help? thing to do is, - i think

the first one to remind yourself that you're normal. it doesn't feel very normal, because it can feel messy, your emotions might be all over the place, but reminding yourself that those things are normal, honestly that helps. so, there's one thing. the other thing is to find places where you can tell the truth about how you feel and places where you can ask any questions you have. sometimes, you have an adult that you trust. sometimes, it's your peers or professional places like the national suicide prevention helpline might be a good place. whether or not you're feeling like harming yourself, just because they know some good places to check in. the thing to remember is that you deserve support that makes you feel honored and heard no matter what you're experiencing, so don't be afraid to keep asking for help. - thank you, megan. - you're welcome.

and Meanwhile speaking of stupidity there are numbers that have just come now owned of from as a senior living based on government numbers they have broken Down state by state by state we life expectancies now life expectancy nationwide his decline for the past 3 years not much but a little bit has gone down from 78.8 % it is 78 years 8 months to 78 years 6 months that according the centers for disease control and Prevention and Deezer report published in the Journal of the American medical Association factors affecting a life expectancy varies somewhat from state to state and Washington state where I'm privileged live does pretty well here we're 8th best in life expectancy here where about two years ahead of the national average the that's pretty good but nationwide cancer and heart disease remain

the two most common cause of death Meanwhile suicides drug overdoses and liver disease connected alcoholism skyrocketed according to a study it Here's one of things I think is fascinating is overall which state has the longest life expectancy at birth it's hawaii Yeah and 81 point years 3 months the lowest life expectancy at birth it's mississippi 74 years 7 months so almost ae 7 years difference between the lowest and highest now 7 years you think about that you think about what that means if you're looking over the course of a lifetime is so not and in terms of suicide you know it's stunning to me which state has its most suicides Montana and it's way way new York state has the lowest rate of suicide and they think that while other reasons for that is because it's so crowded because one of things that causes people to commit suicide as isolation and new York has 8.1 400000 in montana it's at 28.9 so it's almost 4 times as high rate of suicide in montana Here's one of things I think is stunning and disturbing is in 9 States that have the lowest life expectancy are all on the sound Mississippi louisiana alabama Arkansas it's problematic they tend to be also very Republican States and each Here's the interesting thing is how much more would they be Republican States if they have a longer life expectancy for one of these you see with all these numbers across the country if Republicans do very well when people move on and lie so Let's keep our cells alive he can do stuff it's healthier smoking has a tremendous impact on life expectancy obesity is a lack of exercise so much of this actually is something you can control for your own safety and for the sake of this great nation.

Here's one thing that does argue in favor of that it was suicide don't have his age right in front of anybody was in his 50s early 60s he he wrote a brand new will two days before he committed suicide now this guy's been in trouble for a long time he was convicted of some rather minor offenses means some major offenses given minor punishment about a decade ago another coming back at him but he thought he was going to win according to his attorneys so why would a guy who write of in any worth I'm is worth about 6 million dollars was any put most that money in a trust so that most of the victims will not be able to get a dime out of his state why would a guy if you heard that guy Re wrote his will and then two days later did commit suicide with that idea a convincing reason because otherwise if you thought I'm healthy I'm going to win Mike court case I'm get out of here what other thing would explain Re writing as well and then two days later suicide it very good pot our the other side of that coin immediately get to them both Mr. O.J. Simpson and hillary clinton which as you well know all along and kale he had a barrel of money and so they got the only thing I'm thinking about he got too much money eventually Body lay out fc I believe you're right I believe you're right but then then again the argument would be if you think I'm healthy I'm not feel like a lot of criminals are filled by the time they get into prison they become ill while in custody this guy wasn't built by all accounts he was healthy he had an unhealthy appetite for 4 children and Sachs but but why else would he Re write his will if he thought he was going to walk out of jail he thought maybe I'm going to get bail at some point it will be the legal charges against me like I did before why would he Re right as well and is just go ahead so many facets that I mean did somebody else we write this well I mean there's all kinds of well according to his attorney and

emory he rewrote his will specifically I guess it makes me think if a guy I thought he was going to cash in his Own chips that he might say I'm gonna do this right now on and put everything I own it in a trust so it after I'm dead if he had not read the if he had not told his attorneys to put all his assets in a trust then when his many victims bring lawsuits after his death they would have had access to his ass says CEO and hung a 100 million dollars with homes own 20 million dollars with airplanes and boats he had big checking account a litter early cat not as a checking account but he had cash on hand 50 million dollars Yeah 190 million in private investments in private equity's another e-mail phone parts of buildings and other things that have big investments he had about 600 million dollars in assets any specifically lock those up in a trust Re road as well and two years and two days later he either gets murdered or commit suicide I would argue that while I thought originally it didn't seem likely that he killed himself most pedophiles to narcissistic to take their own lives that did in this case he might have done it he said I'm going to cash in my own ships and rewrite the Wilson nobody can get my stuff and nominee checkout I hope they keep investigating because I felt like we owe her a goal-scoring the guy yelling down a lot Mo and there's so many people who work in that correction center water be prosecuted apparently they falsified documents to do all those other things and I think they'll go after I thinker name is elaine elaine Maxwell who was apparently the person the woman who helped him for sure these juvenile girls she ought to go to go to jail but I agree with you there and the other thing I've suggestively there are a lot of these women who have a legitimate cause against him and now he's dead they won't see him on trial they won't be able to testify against him my suggestion a few days ago there's there's something it doesn't happen very often anymore but it's called an inquest and it's a lot like a trial except you don't have to have a criminal prosecution going hold an inquest they held one decades ago in Multnomah County over the death of a guy named Lloyd Stevenson who died at the hands of police and had done absolutely nothing wrong I mean this guy wasn't even suspected of a crime he was just a horrible series of mistakes this man died in the community wanted some answers so they held an inquest which is held almost like a trial you can swear people when you can hold you can take testimony he knew all that and then you generator reported the end says this is everything we know about I kind of think they ought to have an inquest into Jeffrey Epstein's death and into the the allegations by his accusers which it sounds like we're absolutely rock-solid mood that's what I would like all soap I think that would satisfy an awful lot of people as much as you can be satisfied I wish he'd been able to string this guy by his private frankly.

for teens, escaping from social media is nearly impossible./// but experts can offer some ways to help./// bianca castro reports.## + + + loc+ + + (nats debbie sees the effects of social media first hand at home. (nats: "what are you looking at?....google.") and at work.... (sot: debbie dobbs - executive director - the counseling place, tx) "it's just a part of life now so it's going to come up all of the time." she's the executive director at the counseling place in richardson. here, counselors intervene when children and teens fall into a dark place. police also call on them during possible suicide calls. + + + debbie+ + + :25 (sot: debbie dobbs - executive director - the counseling place, tx) "they go into a group chat or direct messaging with others who may be feeling the same and then they just stay in that dark place and they don't get out." experts say a negative comment, or a screen shot, or a video that goes viral, can have the same mental distress experienced by an adult who has lost of job. that's because teens lack maturity and life experience. + + + dr. betsy+ + + (sot: dr. betsy kennard - psychiatrist) "kids don't see the future like adults do so when they are miserable, they think they are gonna always be miserable." that's why psychiatrists say parents should talk with their teens openly about what happens on their social media accounts. (sot: dr. betsy kennard - psychiatrist) "it's so easy to say 'oh will get better. you're gonna be fine. don't worry about that, it's not a big deal' and really, the kid, that invalidates their world view or their lens as you said. so really hearing them, helping them feel heard." parents should also talk with their child's school if they suspect cyberbullyin. and parents should set stronger restrictions on their teen's social media use, even if it's not the popular rule at home. (sot: debbie dobbs - executive director - the counseling place, tx) "there are so many parents that say 'that's just the way it is now. that's just the way it is'. it's the way it is because we let it." (nats: "and then i get judged and people don't want to talk to me.") (nats: "when i'm trying to do things for your mental health and put some restrictions and not just let you be immersed in your phone and then there is other parents that don't do that, it's frustrating for me, it makes it hard for me.")## according to the cdc, suicide is now the second-leading cause of death among children ages 10-18./// young victims of cyberbullying are twice as likely to attempt suicide and self-harm according to this study.

Developing news... the case against jeffrey epstein is no more. it was dismissed in a new york court yesterday. the disgraced multimillionaire was awaiting trial on sex trafficking charges... when he committed suicide in his cell earlier this month. the judge cited his death as the reason to dismiss the case. some of epstein's alleged victims still want the case to continue. they have called for charges against those implicated in epstein's alleged sex trafficking ring. prosecutors say they will continue to investigate.

we'll learn about america's warrior partnership a nonprofit that works to help veterans integrate into communities and vice versa so how is the community do it they organized a quote unquote identify it but her power and leverage and then why is it it take to make the service for in Lake leadership and then more importantly you know pro-life community it makes financial but we talked to a lot of veteran organizations on the shot that includes the veterans service organizations non Profits the V.A. and someone now they all tend to have a different focus and often a different opinion on the veteran world but there's one thing I that each and everyone I've talked to seems to agree on it is this suicide and mental health are the two most important issues facing the veteran community now nearly all of these organizations are working hard to address those related concerns they're putting millions of dollars towards research outreach special programs and more some people might think that's enough that having these big groups take on the problem is the key to solving some individuals out there doing their part including working to bring awareness to those issues beyond the veteran community these folks are doing it because believe it or not many maybe most Americans have no idea of the scope of the veterans' suicide and mental health epidemic maybe that Tom's Allen is one of those individual is he recently completed a 2800 mile walk across the country with the aim of bringing awareness and raising funds pit aid in the fight for his brothers and sisters in arms Tom joins me from Poughkeepsie new York as he recovered from the attorney to talk about what he learned but first wanted to find out who he was and what drove him to start walking what you do when the baby I know where you're from wenger joy and what you do you were in I could have made the decision that joining an enlisted in the Navy after graduating college which made my parents really happy I listen 91 right after graduating from college I got out Christmas 96 was neglect Tricia and I wasn't two cruisers U.S.S. trucks and the U.S.S. California both was went to the Persian Gulf war when I was there I station that the Bremerton met you think back to the 1996 when you got out of the Navy what was that point of time in your life like and what was the track he pursued after leaving the world's finest maybe you guys I really didn't know what I wanted to do after I got out use the G.I. bill to become basically a college professor which is warm so doing today use jeff go under grad school but the transition for me was pretty easy Ariana college degree he had a pretty good it's a family support system which is not the story that we hear a lot from our younger veterans there a transition a lot more rocky it often can be I am one of the other interesting things about that is I think you may be one of the first people if not the first went from the military to being a college professor is that something you'd recommend people know a lot of us this service get the opportunity to experience at a young age of being instructors whether of your division whether at 8 school or something like that what do you think about going the education route Yeah I mean definitely me it takes guts no patience mind being a teacher or professor you have to have the right temperament so not everybody is cut out for that look I do but it was a great way to transition from my they love because when you are at the OPS Sir you're doing a lot of same things as far as instructing younger people in in in what they should be doing so it wasn't easy transition for rates and Yeah it's it's a great way to live for I learn a lot but you have to like to read yet like to learn as a lifelong think one of the things I think for those of us who served as you said it's petty

officers senior Worry that the college students they're not so much enlisted we were aid mean what what should I call for mandatory audience were required to pay attention to our military our had be found that to be the case or are is is the reaction from the students more positive than some people might think Yeah I used to teach at the University of Alabama forward sure students probably were a little less focused that can go anywhere teach now Marist college in Poughkeepsie new York but Yeah so you students don't have to be there in college and a lot of it shows you know not everybody is cut out for toler even know we think everyone should go to college or high school Aussie definitely see a lot of that so you know kind of working with students to kind of focus their energy well of course you recently focus your energy and this is the main reason we wanted to talk to Tom R Allen was you just walked 2800 miles from oregon O in new York tell me where the idea for this walk came from and what the goal of it was well it was a bit lower of insanity but I became the commander of be the local VFW posts backing to keep seeing about a year and a half ago and I'm a veteran and I have a many friends of veterans I really have no idea so many veterans much just what community were struggling a line in the areas of mental health and homelessness financially anxious so there was really no my eyes experience I get a phone call still commander and I get a phone call pretty much every day from a veteran or former nonprofit on behalf of veteran needing help in more of these areas so frustrated could help everybody who didn't so I decided to I do something really big crazy to raise awareness on my only real community across the nation not can't sing dance and and I can't really run or 50 years old sought sung villa they could do that challenge myself was was to walk that some of those vets zero walk was born and through that law you've been able to bring attention to this scourge of suicide mental health issues that are facing us as a community of the veterans I think there are those out there of course who who are aware of it who would be surprised that so many people have no idea of what we're facing when it comes to those issues is that what you found while you were walking him beforehand there's just a lack of awareness of exactly right I would need veterans and people who are veterans of the Street walking every day and many of them had no idea about the numbers you know that 22 veteran suicides every day America or the 40000 plus homeless veterans every night in America and that really shocked me and I think everybody wants to do something to help our veterans is a one-issue I think we can all agree on but if you don't know about these numbers you think everything's fine say thank you for your service but it's really not so when people are these numbers there really shocked and chaos think we're raising a lot of awareness across the country when we return we'll have more with maybe that tums help who recently completed 28 100 mile walk from forward into new York to raise awareness of mental health issues.

air force veteran Jimmy Graham is the CEO of america's warrior partnership he joined me to talk about their symposium in atlanta this week they're researching about suicide and the organization's goal of helping vets and their communities thrived together we'd be over a way to approach it is an individual level at a community level so community gets another reference Um and local level but they understand who they are we've come through heard anyone reported for 85% of veterans are looking to get back there looking for volunteer opportunities

and looking to network with other veterans move the so what we are buying is why it's good for the community so not the community do it they organized themselves could it to to broaden identify it becomes harder and leverage them and then why are we good because it just makes it makes service fence that makes leadership fence and then more importantly you know for a lot of communities it makes financial sense we don't we do in the mail also some our communities the communities we serve the about trends increased revenue into communities by about 30 million \$ a year just through the access to the GED they're using their get to know reducing moving it using the V.A. for health care work from home alone benefits and and need be a disability benefits for us that's pretty pretty big economic impact for reference does a lot of veterans to unless you knew them while they were in or are a family member there is you're probably not going to know they serve right sure exactly and I think that there's you know one of the things I always say to people it's Um I how many times are you mad about trend wished those who work in space how many times have you met a veteran and error durant gracious and you say I wish I had known the six-month people because this never would have happened and so I think that thirst there are a lot of programs to improve the quality of life for veterans and the that get there than most veterans are aware of america's warrior partnership is doing something to address that in fact you have your 6th annual warrior community integration symposium taking place September 4th to 6th in the Atlanta tell me a little bit about this symposium in and what the goals and what the focus so that all our yet Hey expressed in the booth oppose him drugs by difficult under attendees from what Aster risk to earn 40 different organizations from 48 kate so come from all over the United States everyone comes to atlanta I'm a big piece of the networking but it's it's a good smart networking in that was took it I spent most of my time over a week connecting people whether they're a national program that we nonprofit program that the local community program could benefit from I connect we confidently are pushing organizations you know the like matchup we're pushing them together to defeat hate government national government national nonprofit can you guys work together he local nonprofit you could really use a service from its other national nonprofit maybe you all can work together and then on the local level teaching community is what the best practices are letting shared together vote good fit for us and that is after this imposing when we feed in gear organization say I can better serve veterans a light now because people of the people I met at the symposium as I understand it from looking down what's going to take place at the symposium is also will be some those biggest issues in the veteran community taken on head on at the symposium including about the research into veterans' suicide what we can do about it as I saw on this list it looks like the first ever community they study on ending veteran suicide is actually going to be presented at your event right H for if our study we eat we started in partnership with the University of Alabama and and the support of the Bristol-Myers Squibb Foundation what we recognized for the community level was we we really didn't have a good picture in Buffalo new York Let's justet I don't know what the that Turner was going to take their life the characteristics of them look like where they went when they do where they lived but with their habits and center as compared to what kind of joke going and we knew that they were we knew that the communities but community he environment had a big impact so we always wanted to do the study what's the difference between mobil alabama and minneapolis they call or like thin Orange County california and dyou in indianapolis where and how is the pattern is about to take a life look different from the bedroom in in indianapolis as compared to

another another location we have the big benefit to that was we can improve our prevent what this one of the things we found one of the things we'll talk to the imposing weak £ bet when you pull the source data from the county's the death records etc and really look at them Nagar get level to what can I do that that maybe we'll learn we are in terms of that good thing quality of the data it's not there in minneapolis 65 counties are working in one County validates that the that the person who got it who got it who took their life served in the military one County had a 65 there's 35 of the counties that don't even marked down whether the person served in the military that and then there's one County that have done that...

I've got a couple of stories to pay for you here coming up shortly and one of them is pretty insane because it's red flag laws at work and it has to do with somebody just called and said that this elderly homeowner seemed like he was suicidal and then the cops descended they took all the firearms and he was reported on by nbc is that he was this dangerous criminal and then they lied they said okay the threats gone they arrested so they they they were called there because it was said he was suicidal and dangerous to himself and said they arrested his guns but not the guy that they thought was meant to and they perform health evaluations anything like that so was based on a call that a red flag was aware that's how I fly does work anyone tell you that due process is protected the proposal for red-flag laws is lying to your face I don't care who they are they're lying to you I have a little early no exaggeration read all the 17 laws that have been implemented across the country with regards to red-flag.
